The American Teacher Donald H. Parkerson, Jo Ann Parkerson, 2010-06-21 *The American Teacher* is a comprehensive education foundations text with an emphasis on the historical continuity of educational issues that empowers prospective teachers to channel their innate idealism into effective teaching practices

From Teach For America to Teach For China Sara Lam, 2019-11-13 This book examines the role of Teach For China in addressing educational equity and expanding public participation in education The author uses the case of Teach For China to explore the broader theme of the mobility of education models between contexts characterized by neoliberalism and those characterized by strong state control Transnational advocacy networks are increasingly influential in the education policy making process These networks comprised of entrepreneurs and education corporations think tanks philanthropists and government agencies facilitate the global mobility of policy models It is widely accepted that an education model should not be transplanted from one context to another without careful consideration of how contextual differences might impact the model's effectiveness The book explores the argument that the same model is not only quantitatively different in terms of effectiveness but that models can play qualitatively different roles in neoliberal and strong state contexts sometimes moving education reform in opposite directions The book will appeal to anyone interested in global teacher education reform and equity in education

Only in New Orleans Luis Mirón, Brian R. Beabout, Joseph L. Boselovic, 2015-07-22 With 2015 marking the 10th commemoration of Hurricane Katrina education reform in New Orleans continues to garner substantial local national and international attention Advocates and critics alike have continued to cite test scores new school providers and different theories of governance in making multiple arguments for and against how contemporary education policy is shaping public education and its role in the rebuilding of the city Rather than trying to provide a single unified account of education reform in New Orleans the chapters in this volume provide multiple ways of approaching some of the most significant questions around school choice and educational equity that have arisen in the years since Katrina This collection of research articles essays and journalistic accounts of education reform in New Orleans collectively argues that the extreme makeover of the city's public schools toward a new market based model was shaped by many local historically specific conditions In consequence while the city's schools have been both heralded as a model for other cities and derided as a lesson in the limits of market based reform the experience of education reform that has taken place in the city and its impacts on the lives of students families and educators could have happened only in New Orleans
