I. F. David, K. Shankland, L. B. McCusker, Ch. Baerlocher, 2006-08-03 The art of solving a structure from powder diffraction data has developed rapidly over the last ten years to the point where numerous crystal structures both organic and inorganic have been solved directly from powder data However it is still an art and in contrast to its single crystal equivalent is far from routine The art lies not only in the correct application of a specific experimental technique or computer program but also in the selection of the optimal path
