Empirically Based Interventions Targeting Social Problems John S. Wodarski, Laura M. Hopson, 2019-11-12 This unique volume demonstrates the effectiveness of applying an evidence based practice process to the solution of selected social problems. It focuses on social work interventions addressing family, community, and societal factors. Research indicates that reinforcement for positive behavior at the group, organizational, and community levels, as opposed to interventions focusing on the individual, are more likely to result in meaningful improvement in well-being. Chapters address issues such as child maltreatment, educationally disadvantaged children, violence in schools, adolescent sexuality, substance abuse, crime, urban decline, and homelessness, unemployment, marital conflict, and chronic medical problems. **Empirically Based Interventions Targeting Social Problems** is a relevant resource for practitioners and counseling professionals whose work involves interventions with children and families, as well as communities. It also is a useful text for graduate students in social work, as well as students preparing for other helping professions, including psychology, sociology, marital and family counseling, and child development.

Public Policy and Higher Education Edward P. St. John, Nathan Daun-Barnett, Karen M. Moronski-Chapman, 2013 Amid changing economic and social contexts, radical changes have occurred in public higher education policies over the past three decades. **Public Policy and Higher Education** provides readers with new ways to analyze these complex state policies and offers the tools to examine how policies affect students' access and success in college. Rather than arguing for a single approach, the authors examine how policymakers and higher education administrators can work to inform and influence change within systems of higher education using research-based evidence, along with consideration of political and historical values and beliefs. **Special Features:** Case Studies allow readers to examine strategies used by different types of colleges to improve access and retention; Reflective Exercises encourage readers to discuss state and campus context for policy decisions and to think about the strategies used in a state or institution; Approachable Explanations unpack complex public policies and financial strategies for readers who seek understanding of public policy in higher education; Research Based Recommendations explore how policymakers, higher education administrators, and faculty can work together to improve quality, diversity, and financial stewardship. This textbook is an invaluable resource for graduate students, administrators, policymakers, and researchers who seek to learn more about the crucial contexts underlying policy decisions and college access.
