Modeling and Forecasting Monthly Tourism Arrivals to Aruba Since COVID-19 Pandemic Olga

Bespalova,2022-11-11 This paper improves short term forecasting models of monthly tourism arrivals by estimating and evaluating a time series model with exogenous regressors ARIMA X using a case of Aruba a small open tourism dependent economy Given importance of the US market for Aruba it investigates informational value of Google Searches originating in the USA flight capacity utilization on the US air carriers and per capita demand of the US consumers given the volatility index in stock markets VIX It yields several insights First flight capacity is the best variable to account for the travel restrictions during the pandemic Second US real personal consumption expenditure becomes a more significant predictor than income as the former better captured impact of the COVID 19 restrictions on the consumers behavior while income boosted by the pandemic fiscal support was not fully directed to spending Third intercept correction improves the model in the estimation period Finally the pandemic changed econometric relationships between the tourism arrivals and their main determinants and accuracy of the forecast models Going forward the analysts should re estimate the models Out of sample forecasts with 5 percent confidence intervals are produced for 18 months ahead
