

Unit 4 – Graphs of Trigonometric Functions - Classwork

For each of the angles below, calculate the values of $\sin x$ and $\cos x$ (2 decimal places) on the chart and graph the points on the graph below.

x	0°	30°	45°	60°	90°	120°	135°	150°	180°	210°	225°	240°	270°	300°	315°	330°	360°
$y = \sin x$																	
$y = \cos x$																	

What you are seeing are the graphs of the sine and cosine functions. Since the function values repeat, you are looking at one cycle of the curves. We call these curves **periodic** because of their repetitive nature.

Let us look at these curves on the calculator. For right now, let's stay in degree mode.

Let's note the similarities and differences of the sine and cosine curves:

Similarities

Differences

Since the curves are similar in shape, we call them **sinusoids**.

Note that since these are periodic functions, we can look at as many periods as we wish:

2 periods of sine

3 periods of cosine
