### **Spatial Database Systems**

Albert K.W. Yeung,G. Brent Hall,2007-05-23 The decision to write this book was motivated by a number of factors First although several useful textbooks on spatial databases have recently been published this is an area of spatial information science that has lagged somewhat behind the rapid advances of the technology and the profusion of books on domain specific applications Second much of the information pertaining to spatial database technologies is only available in scattered journal papers and conference proceedings and prior to this book no single effort has been made to sift through this expansive literature and unite the key contributions in a single volume The tasks of sourcing and coherently integrating relevant contributions is

daunting for students many of whom have a substantial number of competing demands placed on them This book should make the task of knowledge building less daunting Third and perhaps most importantly an apparent trend in many spatial information science programs is to focus from first or second year undergraduate through to fourth year courses on learning to work confidently and independently with increasingly complex software tools Hence many courses are technical in nature and while they continue to produce technically adept students knowledge of the broader aspects of spatial databases is often not as complete as it might be among graduates Some programs have sought to address this by introducing courses that focus on spatial data management However these courses are largely unsupported by a relevant and contemporary textbook

*Computational Intelligence for Decision Support*

Zhengxin Chen,1999-11-24 Intelligent decision support relies on techniques from a variety of disciplines including artificial intelligence and database management systems Most of the existing literature neglects the relationship between these disciplines By integrating AI and DBMS Computational Intelligence for Decision Support produces what other texts don t an explanation of how to use AI and DBMS together to achieve high level decision making Threading relevant disciplines from both science and industry the author approaches computational intelligence as the science developed for decision support The use of computational intelligence for reasoning and DBMS for retrieval brings about a more active role for computational intelligence in decision support and merges computational intelligence and DBMS The introductory chapter on technical aspects makes the material accessible with or without a decision support background The examples illustrate the large number of applications and an annotated bibliography allows you to easily delve into subjects of greater interest The integrated perspective creates a book that is all at once technical comprehensible and usable Now more than ever it is

important for science and business workers to creatively combine their knowledge to generate effective fruitful decision support Computational Intelligence for Decision Support makes this task manageable     [Database Modeling and Design](#)  
Toby J. Teorey,1999 This work has been revised and updated to provide a comprehensive treatment of database design for commercial database products and their applications The book covers the basic foundation of design as well as more advanced techniques and also incorporates coverage of data warehousing and OLAP On Line Analytical Processing data mining object relational multimedia and temporal spatial design     [Mining of Massive Datasets](#) Jure Leskovec,Anand Rajaraman,Jeffrey David Ullman,2014-11-13 Written by leading authorities in database and Web technologies this book is essential reading for students and practitioners alike The popularity of the Web and Internet commerce provides many extremely large datasets from which information can be gleaned by data mining This book focuses on practical algorithms that have been used to solve key problems in data mining and can be applied successfully to even the largest datasets It begins with a discussion of the map reduce framework an important tool for parallelizing algorithms automatically The authors explain the tricks of locality sensitive hashing and stream processing algorithms for mining data that arrives too fast for exhaustive processing Other chapters cover the PageRank idea and related tricks for organizing the Web the problems of finding frequent itemsets and clustering This second edition includes new and extended coverage on social networks machine learning and dimensionality reduction

**[Conceptual Modeling - ER 2002](#)** Stefano Spaccapietra,Salvatore March,Yahiko Kambayashi,2003-06-30 For more than 20 years the series of Conceptual Modeling ER conferences has provided a forum for research communities and practitioners to present and change research results and practical experiences in the elds of database design and conceptual modeling Throughout the years the scope of these conferences has extended from database design and speci c topics of that area to more uersal or re ned conceptual modeling organizing originally weak or ill structured information or knowledge in more cultured ways by applying various kinds of principles abstract models and theories for di erent purposes At the same time many technically oriented approaches have been developed which aim to facilitate the implementation of rather advanced conceptual models Conceptual modeling is based on the process of conceptualization and it is the core of system structuring as well as justi cation for information systems development It supports and facilitates the understanding explanation pred tion and reasoning on information and knowledge and their manipulation in the systems in addition to understanding and designing the functions of the systems The conceptualization process aims at constructing concepts relevant for the knowledge and information system in question Concepts in the human mind and concept descriptions in computerized information systems are quite di erent things by nature but both should be taken into account in conceptual modeling Usually concept descriptions are properly observed but concepts in the human mind and their properties are often neglected quite carelessly
