Making Algebra

Come Alive Alfred S. Posamentier, 2000-07-21 Activities in Algebra is a set of versatile enrichment exercises that covers a very broad range of mathematical topics and applications from the Moebius strip to the googol Several criteria have been used in developing the activities and in selecting the topics that are included All of them bear heavily and equally on our concerns for curriculum goals and classroom management Each activity is presented as a reproducible student investigation It is followed by guidelines and notes for the teacher Each activity is keyed to the National Council of Teachers of Mathematics NCTM Standards Revised This link to the NCTM standards allows teachers to facilitate linking classroom activities to specific state and school district content standards First and foremost the activities are meant to be motivational As much as possible we want this book to achieve the goal of being attractive to people who thought they didn't like mathematics To accomplish this it is necessary for the activities to be quite different from what students encounter in their basal texts different in both substance and form This seems especially critical no matter how excellent a basal text is being used nearly every class experiences the blahs Unfortunately this sort of boredom is often well entrenched long before the teacher and perhaps even the students are aware of it Presenting activities on a regular basis gives the variety and change of pace needed to sustain interest in any subject [The P.S.E.A. Benson, 2003 *How to Meet Standards Motivate Students and Still Enjoy Teaching* is a truly outstanding practical resource that should be in every educator's professional library. It succeeds beautifully with the complex challenge of defining a classroom in which standards come alive for teachers and students in a doable manner. From the Foreword by Spence Rogers Founder and Director Peak Learning Systems. Most states in the USA have adopted some form of standards and accountability into their systems but few teachers understand how to model their classrooms to prepare their students to thrive in this new educational environment. In this book the author offers teachers the tools they need to build the standards based classroom. Rather than throwing away all their valuable techniques and experience teachers learn to synthesize the best of what they already know and do with current and emerging research on learning and learners. The four components of the standards based classroom will help teachers plan lessons assess student work and create a community of learning that meets the standards that have been set for their students.

Teaching Virtues Donald Trent Jacobs, Jessica Jacobs-Spencer, 2001 This book about teaching virtues is based on a fundamental American Indian view that sees the universe as intimate relationships of living things that are vitally affected by attributes called universal virtues. These virtues cross all boundaries and cannot be taught in isolation. They are woven into all subjects that are worth learning. Part 1 provides psychological perspectives that underpin the book's approach. Part 2 shows how various pedagogical strategies can turn subject matter into significant relationships. Since teaching virtues is ultimately about relationships a natural way to embed awareness of virtues unfolds when there is a consistent commitment to teaching virtues daily. Chapters introduce the lesson plan format and the conceptual model explore the meanings of vital terminology and discuss assessment strategies. Part 3 realizes the actual interconnections between virtues and content knowledge with chapters that address social studies language arts science physical education mathematics and the arts. These chapters show how the process works to truly integrate content and character education. Part 4 offers an opportunity for profound reflection on the issues and challenges surrounding effective character education. Contains 75 references. TD **Shattering**

Inequities Robin Avelar La Salle, Ruth S. Johnson, 2018-12-14 For education leaders who believe that all students deserve the premium education that only some currently experience *Shattering Inequities Real World Wisdom for School and District Leaders* shows how your leadership can provide equitable outcomes for our most vulnerable students. Chapters include examples of actual equity leaders and leadership lessons as easily retrievable equity hooks memory cues of complete complex and nuanced leadership takeaways. In the throes of educational transformation the book's examples provide leaders with practical ways to quickly and effectively infuse substantive thoughtfulness into common equity challenges and inspire equity driven action to ensure that demographics do not determine destiny.
