The Geography of Injustice Barak Kushner, 2024-03-15 In *The Geography of Injustice* Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan s empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan s imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption *The Geography of Injustice* offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

everywhere *After the Education Wars* Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers. After the Education Wars helps us to see a better way forward. Cathy N Davidson, The New York Times Book Review. After the Education Wars is an important book that points the way to genuine reform. Diane Ravitch, author of *Reign of Error* and *The Death and Life of the Great American School System*. A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler, more democratic entrepreneurialism. In an entirely fresh take on school reform, business journalist and bestselling author Andrea Gabor argues that Bill Gates, Eli Broad, and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world. After the Education Wars explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster, and contrary to popular belief, at odds with the best practices of thriving twenty first century companies as well. These rich, detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up. Lessons also learned from both the open source software and quality movements. The good news is that solutions born of this philosophy are all around us. From Brockton, Massachusetts, where the state's once failing largest high school now sends most graduates to college, to Leander, Texas, a large district where school improvement spurred by the ideas of quality guru W. Edwards Deming has become a way of life. A welcome exception to the doom and gloom canon of education reform. After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools. *The Tumultuous Politics of Scale* Donald M. Nonini, Ida Susser, 2020-01-23 Contemporary politics, this book contends, depend upon the turbulent struggles and strategies around scale. Conflicts over scale can be seen as opaque class struggles. Political projects, whether from the ground up or representing corporate or state interests, continually contest the scale at which authority is vested. This volume looks at the way global corporations redefine the scale of power and how working class and other movements build alliances and cross scales to develop political blocs. What injustices are perpetrated or more hopefully redressed in this process? The book, consisting of contributions from anthropologists, geographers, and cultural studies scholars, explores theoretical issues around contested temporal and spatial scales and around variations in scale from the body to the global. Part I focuses on bodies in motion entangled in battles over new boundaries and political coalitions and the ways in which migrants and refugees are disrupted by intersecting time scales. Part II on the nation state addresses the shifting responsibilities assigned by law at different historical moments and the impact of global energy trade on national austerity policies. Part III on rescaling sovereignty discusses the misleading media discourse on Brexit and reconstructs the class bases of the move to the Right in Eastern Europe that threaten the EU. Part IV on the histories of changing scales of movements revisits historical debates on uneven and combined development and sets out the transnational labor movements of the eighteenth and nineteenth century Atlantic

which prefigure contemporary struggles of labor in a world which is still one of uneven and combined capitalist development. Finally Part V considers ways in which some social movements are constrained by scale while others reshape parties and traverse nations in their efforts to build class alliances and political blocs.

Brexit and After Kumiko Haba, Martin Holland, 2020-12-12

This book makes a new departure from others on the subject. Not only does it analyze Brexit from the domestic point of view in the UK democracy, social analysis and construction of new institutionalization with the EU, it extends the analysis externally and reconsiders the EU and UK relationship with Asia and the implications for international relations and a new world order. From this foundation, this book presents a broad and diverse spectrum of views concerning Brexit and the EU. For these reasons, it serves as an original and excellent textbook for undergraduate and graduate students as well as for researchers of the EU and international relations.

Contributions to this volume are from the European Union Studies Association (EUSA) Asia Pacific Tokyo Conference and affiliated conferences at the following universities between 2017-19: Aoyama Gakuin University Tokyo, Taiwan National University Taipei and Fudan University Shanghai. Almost all of the authors have engaged in interdisciplinary research on the EU, are members of the EUSA Asia Pacific and have made public presentations on Brexit and how it relates to the EU, Asia, international relations, economics and institutions. Therefore, this book presents various aspects of Brexit and its aftermath from the perspectives of the disciplines of political science, economics and international relations in its analysis of the UK, the EU, Asia and the future world order.

The EUSA Presidents and executive committee members participated in the Asia Pacific Conference postgraduate student workshops, were organized and their presentations moderated, thereby guaranteeing both the quality of the contributions to this book as well as encouraging young talented scholars to write about Brexit and the EU. While many books on Brexit have been published, this book offers many new and perspectives that provide suggestions for possible solutions to the problems facing the UK and the EU after Brexit.
