Changing Times for Frontier Markets Nordine Abidi, Ms. Burcu Hacibedel, Ms. Mwanza Nkusu, 2016-08-23 This paper investigates to what extent low income developing countries LIDCs characterized as frontier markets FMs have begun to be subject to capital flows dynamics typically associated with emerging markets EMs Using a sample of developing countries covering the period 2000 14 we show that i average annual portfolio flows to FMs as a share of GDP outstripped those to EMs by about 0.6 percentage points of GDP ii during years of heightened stress in global financial markets portfolio flows to FMs dried up like those to EMs and that iii FMs have become more integrated into international financial markets Our

findings confirm that in terms of portfolio flows FMs have become more similar to EMs than to the rest of LIDCs and are therefore more vulnerable to swings in global financial markets conditions Accordingly it is important to have in place frameworks to strengthen FMs resilience to adverse capital flows shocks
