Gildea, H. Goodwyn, M. Kitching, H. Tyson, 2014-11-28 An accessible and wide ranging consideration of concerns facing English Studies in its surrounding context of the university and society The contributors to this volume seek to trace in the face of current challenges historical and contemporary debates surrounding English Studies **Learning with Mobile and Handheld Technologies** John Galloway, Merlin John, Maureen McTaggart, 2014-11-20 As technology evolves we are ever more reliant on the use of handheld and mobile devices yet what do we know about their impact on learning While there is a lot of interest in mobile technology many schools still aren't sure how to best use it for learning and teaching Learning with Handhelds and Mobiles explores this landscape and offers examples of how these technologies have been used for learning how the problems that have arisen are being addressed and offers ideas for the future This invaluable book gives a voice to teachers and educators using mobiles and technology enhanced learning in and out of schools for regular school work and for innovative projects through exciting partnerships like Apps for Good Learning with Handhelds and Mobiles shows the changes that are taking place within schools as a direct result of these emerging technologies and contains case studies with accounts of best practice in a variety of settings including primary secondary and special schools and learning beyond their boundaries The book also explores themes of pedagogy communication and affordances collaborative learning individual creativity and expression self directed and informal learning and outdoor education The learning potential of handheld and mobile devices has excited teachers and educators but until now there has been no structured systematic overview available along with reflections on how this technology is changing educational practice This book brings these together to provide a clearer picture of what is currently a fragmented area and offers expert views of how we can understand these and where it may take us next *Secondary Maths in Action* Emma McCrea, 2015-07-11 In Secondary Maths in Action experienced curriculum expert and maths teacher Emma McCrea offers insights into the complex task of teaching maths Taking an evidence informed stance Emma first explores the age old question of why we study maths and the important role it plays in our lives and in society Next she examines several pertinent debates in maths those of pupil grouping mastery and gender Finally we are taken on a grand

tour of curriculum pedagogy and assessment as the fundamental pillars of great teaching Additionally the book includes four rich case studies revisited throughout the curriculum pedagogy and assessment chapters which help to showcase how these ideas can be applied in various contexts so you can really see what it all looks like In Action **2012 GCSE English results** Great Britain: Parliament: House of Commons: Education Committee,2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007 09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Language Debates Various, 2021-11-25. This book captures an urgent moment for language teaching, learning and research. At its core are a series of debates concerning gender stereotyping, the place of linguistics in modern languages, language activism, multilingualism and modern languages and digital humanities. Taken together, these debates explore the work that languages and those who learn and speak them do in the world, as well as the way we think through and in a language and are shaped by it. Language Debates acknowledges the history of language teaching and the current realities of language teaching and learning. It is bold in suggesting ways forward for reform and for policy setting. Languages and language learning are at the heart of a consciously transformative set of goals. This book is therefore essential reading for academics, language teachers, policy makers, students, activists and those passionate about progressing language learning and teaching. The editors and contributors make up a multilingual and multicultural team who work across languages, cultures and borders with a globally informed approach to their work. Uniquely, the debates in this volume are based on events with participants in the Language Acts and Worldmaking Debates Series and/or workshops within the wider research project and take into account the ensuing discussions there. Each debate is accompanied by an interview which serves as a model on how to continue the conversation beyond the printed pages of the book. You can also discover ways to join the debate through links on the Language Acts and Worldmaking series website www.jmlanguages.com/languageacts which includes recorded debates, additional materials and more information about the series. Like all the volumes in the Language Acts and Worldmaking series, the overall aim is two-fold: to challenge widely held views about language learning as a neutral instrument of globalisation and to innovate and transform language research, teaching and learning together with Modern Languages as an academic discipline by foregrounding its unique form of cognition and critical engagement. Specific aims are to propose new ways of bridging the gaps between those who teach and research languages and those who learn and use them in everyday contexts; from the professional to the personal, put research into the hands of wider audiences; share a philosophy, policy and practice of language teaching and learning which turns research into action; provide the research experience and data to enable informed debates on current issues and attitudes in language learning, teaching and research; share knowledge across and within all levels and experiences of language learning and teaching; showcase exciting new work that derives from different types of community activity and is of practical relevance to its audiences; disseminate new research in languages that engages with diverse communities of language practitioners.

HC 258 - Academies and Free Schools Great Britain. Parliament. House of Commons. Education Committee, 2015 The landscape of schooling in England has been transformed over the last five years Academy sponsorship has encouraged and facilitated the contribution of individuals not previously involved in education provision and laid down a challenge to maintained schools to improve or face replacement by the insurgent academy model The development of outstanding Multi Academy Trusts like Ark and Harris offers an alternative system to the one overseen by local authorities while the unified Ofsted inspection regime and published performance data generally allows fair judgment of comparative performance There is a complex relationship between attainment autonomy collaboration and accountability Current evidence does not allow the Committee to draw conclusions on whether academies in themselves are a positive force for change This is partly a matter of timing but more information is needed on the performance of individual academy chains Most academy freedoms are in fact available to all schools and Committee recommends that curriculum freedoms are also extended to maintained schools
