

rules:

#Import Rules

- id: no-wildcard-imports

pattern: from ... import *

description: Do not use wildcard imports

explanation: |

Use import statements for packages and modules only, not for individual classes or functions.

- Use 'import x' for importing packages and modules.

- Use 'from x import y' where 'x' is the package prefix and 'y' is the module name without the package prefix.

- Use 'from x import y as z' if two modules named 'y' are to be imported, if 'y' conflicts with a standard abbreviation (e.g., np for numpy).

- Use 'import y as z' only when 'z' is a standard abbreviation (e.g., np for numpy).

From: Google Style Guide [2.2.4](<https://google.github.io/styleguide/pyguide.html#224-dont-use-wildcard-imports>)

tests:

- match: from numpy import *

- match: from pandas.series import *

- match: from .something import *

- no-match: from math import sin

- id: no-relative-imports

description: Always use absolute imports instead of relative imports

explanation: |

Do not use relative names in imports. Even if the module is in the same package, use the absolute name.

From Google Style Guide [2.2.4](<https://google.github.io/styleguide/pyguide.html#224-dont-use-relative-imports>)

pattern: from \${module} import ...

condition: module.matches_regex(r"^\."

Google Coding Guidelines C

S Ben Porath

Google Coding Guidelines C:

Right here, we have countless books **Google Coding Guidelines C** and collections to check out. We additionally meet the expense of variant types and also type of the books to browse. The conventional book, fiction, history, novel, scientific research, as with ease as various supplementary sorts of books are readily available here.
