On the other hand, white stars are roughly the same size as the Earth, yet they are much hotter than the Sun. Complete the following steps using the following information:

1. Find the yellow and orange, approximately 100 times the size of our Sun. (Use as a Chart template.)
2. Find the white and blue stars on the H-R chart. Complete the graph. They are the hottest and smallest stars. Circle them, and label the group of stars "White Dwarfs".
3. Find the blue and green stars, approximately 100 times the size of our Sun. Complete.
4. The remaining stars that are located in an area that is quite different from the other stars. Circle and label them "Main Sequence".
