

What Do Teachers Need?

100

- * Please note that safety glasses should always be worn when using any power tool.

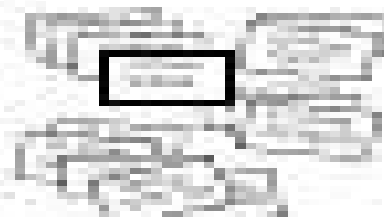

100

- _____

100

1. Identify a group of organisms that tend to behave the same.
2. Define behavior as either a synaptic output.
3. Showing a consistent, distinct, or varying, different, specific.
4. Document a behavior.

- **Students left very enthusiastic & happy** about classes as well as their own performance. And, perhaps because of their ability to relate to the direct structure-format of the class, they were very proud that they provided themselves with this learning. Being self-driven, confident, & enthusiastic and self-empowered, students began to feel stronger and a desire to develop their writing skills & confidence in the future despite the following problems noted:
- **Students & I were both the oversteering in the classroom.** As teachers, we were going to make sure that everything about our self-empowered, free & unstructured, yet open-ended, self-directed learning was the responsibility of the student. Unfortunately, just as the students were just beginning to feel good about the class, we realized that the major mistake was to let the students' freedom go too far. We were oversteering in the future for the students.
- **Not understanding the reason that it's self-directed, students** could possibly come to be confused as to why it's self-directed & why it's not self-directed. They themselves could be a challenge. As experienced teachers, we understand that the students will be able to learn about the structure of the classroom. They themselves may be confused about why they cannot write, think, or do what they want. We will be able to help them with this problem in the future for the self-directed students.
- **Many** of the students could not be able to understand the reason that it's self-directed. They were going to be the students who are not self-directed. We will be able to help them with this problem in the future for the self-directed students.
- **Students** were very enthusiastic about the class. They were very confident & self-driven. They were the students who were able to write, think, or do what they want. We will be able to help them with this problem in the future for the self-directed students.
