and Interactions represents the fruit of a project by UNESCO's International Hydrological Programme on this topic. It then explores in detail the manifold hydrological components of the cycle, the diverse elements of urban infrastructure and water services and the various effects of urbanization on the environment from the atmosphere and surface waters to wetlands, soils and groundwater as well as biodiversity. A concluding series of recommendations for effective urban water management summarize the important findings set forth here.

**Urban Water Series UNESCO IHP Volumes** Following from the Sixth Phase of UNESCO's International Hydrological Programme 2002-2007, the Urban Water Series UNESCO IHP addresses fundamental issues related to the role of water in cities and the effects of urbanization on the hydrological cycle and water resources.
