

Proper documentation in the patient's medical record is crucial. All patient's interventions and management are reflected in the patient's medical record by all the rehabilitation team. Documentation should be carefully and fully made. Writing on a patient's chart should be taken seriously as providing quality patient care. Failure to report matters adequately may be evidence of negligence & possible legal action. The rule is, what is not documented, is not done. Documentation should be concise and specific, stating facts and findings, refrain from writing subjective statements or personal opinion. Following the proper rules and guidelines for documentation will not only protect the patient, but you the employee as well.
