Screening of exogenous IAA producing plant growth promoting Rhizobacteria from agriculture soil Rath C.R,Anitta Jose ,Prem Jose Vazhacharickal, Phytohormones plant hormones are chemical messengers that affect a plant s ability to respond to its environment There are five major classes of plant hormones auxin gibberellin cytokinin ethylene and abscisic acid These hormones can work together or independently to influence plant growth Of these five hormones auxin is the most important one The most important member of auxin family is indole 3 acetic acid IAA which generates the majority of auxin effects in intact plants and is the most potent native auxin The indole acetic acid IAA production is a major property of rhizosphere bacteria that stimulate and facilitate plant growth Plant growth promoting rhizobacteria PGPR are commonly used as inoculants for improving the growth and yield of agricultural crops

however screening for the selection of PGPR strains is very critical This study focuses on the screening of effective PGPR strains on the basis of their potential for invitro auxin production Soil samples were subjected to serial dilution and suitable dilution was poured on nutrient agar medium Isolated colonies were subjected to invitro screening using Salkowski reagent which results in pink coloration Appearance of pink colour indicates the presence of IAA producers After morphological and biochemical test this isolated organism were subjected for DNA isolation Isolated DNA was amplified using 16S PCR The amplified products were sequenced and analysed using BLAST and the organism was identified as *Rhizobium oryzae* Auxin production capability of *Rhizobium oryzae* is higher when compared to other strains Plant growth promoting rhizobacteria PGPR have gained worldwide importance and acceptance for agricultural benefits This is due to the emerging demand for dependence diminishing of synthetic chemical products to the growing necessity of sustainable agriculture within a holistic vision of development and to focalize environmental protection *Aquatic Sciences in the Tropics* B.
