Disgorgement of profits is not exactly a household word in private law Particularly in civil law jurisdictions as opposed to those of the common law the notion is not well known What does it stand for It is best illustrated by examples One of the best known being the British case of *Blake v Attorney General* 2001 1 AC 268 In which a double spy had been imprisoned by the UK government before escaping and settling in the former Soviet Union While there wrote a book on his experiences upon which the UK government claimed the proceeds of the book The House of Lords as it then was allowed the claim on the basis of Blake s breach of his employment contract Other examples are the infringement of intellectual property rights where the damages of the owner are limited but the profits of the wrongdoer immense In such cases the question arises whether the infringing party should be disgorged of his profits This volume aims at establishing the notion of disgorgement of profits as a keyword in the discourse of private law It does not purport to answer the question whether or not such damages should or

should not be awarded It does however aim to contribute to the discussion the arguments in favour and against and the organisation of the various actions

principles and seeks to maximize not only human welfare and happiness but also wealth maximization across cultures while considering both the psychic unity of man universal human needs and culture specific factors Thus Anthropological Economics is expected to be inter related to other disciplines of Economics but remain complementary to them i e it is not expected that it will intrude into other sub fields of economics replace them or override their principles in any way It will therefore draw upon other aspects of economic theory and enrich them suitably It is therefore expected that all aspects of Economic theory will be taken into consideration for policy formulation and decision making including those of Anthropological economics and independent context specific judgment will always be applied The new proposed field of Anthropological Economics proposes to take the idea of Human Welfare to its logical conclusion by extending the work already carried out in various sub disciplines of economics and integrating it more tightly with various concepts in Anthropology Many new tools and techniques are therefore proposed as a part of this paper and we believe these will suitably enrich the field of Economics as well While many attempts have been made in the past to integrate the fields of Anthropology and Economics we hope this endeavour will take this exercise to a much higher level by creating a new generation of Anthroeconomists We also hope it will eventually help move mainstream economics away from Neo classical approaches to Anthropological and human centric approaches

**Plotting the contours for India's economic development: Why this could be a role model for other developing nations as well** Sujay Rao Mandavilli, 2024-05-05

In a paper published by us a couple of years ago on Anthropological Economics the year 2020 to be precise we had mooted the idea of trickle up economics as contrasted with the rather more popular and mundane trickle down economics We had argued that the latter would be somewhat dubious iffy inconsistent and non replicable in a wide variety of situations particularly in the case of developing nations We had argued that trickle up economics would actually boost wide ranging economic growth and add to the Gross domestic product in a big way While we never were and still are not big fans of socialism we have always argued and will continue to argue for balanced diversified and equitable economic development models There is a world of difference between the two We had also argued that the economic models pursued by advanced industrial nations will not by and large work in developing nations Thus American style economic conservatism is meaningless in Indian political and economic contexts There are fundamental differences in ground realities between these two different sets of nations It would make eminent sense for the readers of this book to read the aforesaid paper as well as we will not be able to reproduce the contents in this paper in its entirety here many of the proposals advocated and espoused in this paper can also be implemented by developing economies though rather much more slowly We focus only on the meat here
