

Tone Silence

Acknowledge alarms, troubles and supervisories. The panel has alarm and trouble resound with LED flash of new conditions. The flashing trouble LED(s) illuminate steadily on TONE SILENCE and the piezo sounder silences. A second trouble will resound the piezo. The piezo has three sounds for alarm, trouble, and supervisory. Trouble conditions are self-restoring. Alarms latch and require RESET to clear.

Alarm Silence

Acknowledge for alarms and supervisories. The ALARM SILENCE switch will silence the local piezo, change any flashing alarm LEDs to steady, and turn off the notification circuits (not the releasing circuits). The "ALARM SILENCED" LED will illuminate. Alarm silence is a latching function and requires a RESET to clear.

Note: Releasing Circuits will turn off only if Discharge Timer criteria is satisfied, see "Setting Mode of Operation" on page 27."

Alarm Activate

The ALARM ACTIVATE switch may be used to activate Notification Appliance Circuits. ALARM ACTIVATE also activates the System Alarm relay. ALARM Activate is a latching function. Pressing ALARM SILENCE silences the notification circuits and System Alarm Relay and lights the Alarm Silenced LED. Pressing RESET returns the system to normal.

System Reset

The RESET switch breaks power to all initiating circuits, 4-wire smoke power and option boards and will clear any activated output circuits. If any alarms or troubles still exist after reset, they will reactivate the panel. Holding RESET down will perform a LAMP TEST function and will activate the piezo sounder.
