Department of Transportation, Federal Aviation Administration, 2013-06-14 REVISED The Glider Flying Handbook is designed as a technical manual for applicants who are preparing for glider category rating and for currently certificated glider pilots who wish to improve their knowledge. Certificated flight instructors will find this handbook a valuable training aid since detailed coverage of aeronautical decision making components and systems aerodynamics flight instruments performance limitations ground operations flight maneuvers traffic patterns emergencies soaring weather soaring techniques and cross country is included. Topics such as radio navigation and communication use of flight information publications and regulations are available in other Federal Aviation Administration FAA publications. This handbook conforms to pilot training and certification concepts established by the FAA. There are different ways of teaching as well as performing flight procedures and maneuvers and many variations in the explanations of aerodynamic theories and principles. This handbook adopts a selective method and concept to flying gliders. **1931 Flying and Glider Manual** Paul Howard Poberezny, Sylvester H. Schmid, EAA Aviation Foundation, 1931
