Guidelines for Quality Assurance in Colorectal Cancer Screening and Diagnosis Nereo Segnan,Julietta

Patnick, Lawrence von Karsa, 2010 Recoge 1 Introduction 2 Organisation Guiding principles for organising a colorectal cancer screening programme 3 Evaluation and interpretation of screening outcomes 4 Faecal occult blood testing 5 Quality assurance in endoscopy in colorectal cancer screening and diagnosis 6 Professional requirements and training 7 Quality assurance in pathology in colorectal cancer screening and diagnosis 8 Management of lesions detected in colorectal cancer screening 9 Colonoscopic surveillance following adenoma removal 10 Communication Appendices *EcoProduction and Logistics* Paulina Golinska, 2012-08-12

Environmental awareness is driven mainly by the scarcity of natural resources and by more strict legal regulations The modern enterprise policy should look at the relations between economic actions and ecological consequences Ecoproduction is a new business approach which focuses on the most efficient and productive use of raw materials and natural resources in order to minimize footprints on the natural environment This book aims to provide the state of the art as well as new ideas of the environmental conscious operations management The contributors present in the individual chapters problems related to eco friendly production technologies recycling and waste reduction Scope of topics discussed in this book covers also pollution prevention energy efficiency The authors describe problems of information management in complex systems *Driving in Virtual Reality* Björn Blissing, 2020-09-02 In the last decades there has been a substantial increase in the development of complex active safety systems for automotive vehicles These systems need to be tested for verification and validation to ensure that the system intervenes in the correct situations using the correct measures There are multiple methods available to perform such testing Software in the loop and hardware in the loop testing offer effective driverless testing Other methods increase the fidelity by including human drivers such as driving simulators and experiments performed at test tracks This thesis examines vehicle in the loop testing an innovative method where the driver of a real vehicle wears a head mounted display that displays virtual targets This method combines the benefits of driving simulators with the benefits of using a real vehicle on a test track Driving simulators offer repeatability safety and the possibility of complex interactions between actors In contrast the real vehicle provides the correct vehicle dynamics and motion feedback There is a need to know how the technology behind the method might influence the results from vehicle in the loop testing Two techniques for vehicle in the loop systems are studied The first involves video see through head mounted displays where the focus of the research is on the effects of visual latency on driving behavior The results show that lateral driving behavior changes with added latency but longitudinal behavior appears unaffected The second system uses an opaque head mounted display in an entirely virtual world The research shows that this solution changes speed perception and results in a significant degradation in performance of tasks dependent on visual acuity This research presents results that are relevant to consider when developing vehicle in the loop platforms The results are also applicable when choosing scenarios for this test method Dagens fordon innehåller fler och fler säkerhetssystem Vissa av dessa system ger varningar i

potentiellt kritiska trafiksituationer Det finns också mer komplexa system som tillfälligt kan ta kontroll över fordonet för att förhindra en olycka eller åtminstone mildra effekterna Komplexiteten hos dessa system innebär att man måste genomföra omfattande tester Både för att se att systemen reagerar vid rätt tidpunkt men också för att se att valet av tidspunkt är korrekt Det finns många olika sätt att testa dessa system Man börjar vanligtvis med simuleringar av programvara och hårdvara Därefter kan systemet introduceras i ett fordon för att se vilka effekter systemet har när det interagerar med en riktig trafik Att utföra tester med trafik är dock höga säkerhetskrav och det är ofta svårt att samordna komplexa trafiksituationer på en testbana Traditionellt har kör simulatorer varit ett naturligt alternativ eftersom de kan utföra komplexa scenarier i en säker miljö Denna avhandling undersöker en testmetod där man utrustar fordonen med en virtual reality display Genom att presentera omvärlden med hjälp av virtual reality så kan man genomföra scenarier som tidigare varit omöjliga på en testbana Det kan dock finnas inbyggda begränsningar i virtual reality tekniken som kan påverka körbeteendet Det är därför viktigt att hitta och kvantifiera dessa effekter för att kunna lita på resultaten från testmetoden Att kolla till dessa effekter på körbeteendet dessutom kan hjälpa till att avgöra vilka typer av scenarier som riskerar för denna testmetod Det är också viktig information för att avgöra var man bör fokusera den tekniska utvecklingen av testutrustningen

Can smallholder fruit and vegetable production systems improve household food security and nutritional status of women? Kabunga, Nassul, Ghosh, Shibani, Griffiths, Jeffrey K., 2014-05-01 This paper aims to empirically infer potential causal linkages between fruit and vegetable F V production individual F V intake household food security and anemia levels for individual women caregivers of childbearing age Using a unique and rich dataset recently collected from rural smallholder Ugandan households we show that the use of a qualitative tool to measure household food insecurity is robust and applicable in other contexts We also show using robust econometric methods that women living in F V producer households have a significantly higher intake of F Vs than those living in nonproducer households Furthermore F V producer households are potentially more food secure and women caregivers in producer households have significantly higher levels of hemoglobin rendering the prevalence rates of anemia lower among F V producer households We argue that these effects modest as they are could be further improved if there were deliberate efforts to promote the intensification of smallholder F V production
