The Software Encyclopedia 2001, 2001 Nanoscaled Semiconductor-on-Insulator Structures and Devices S. Hall, A.N. Nazarov, V.S. Lysenko, 2007-09-04 This proceedings volume constitutes an archive of the contributions of the key speakers who attended the NATO Advanced Research Workshop on Nanoscaled Semiconductor On Insulator Structures and devices held in the Tourist and Recreation Centre Sudak Crimea Ukraine from 15 to 19 October 2006 The semiconductor industry has sustained a very rapid growth during the last three decades through impressive technological developments which have resulted in products with higher performance and lower cost per function After many years of development it is now confidently predicted that semiconductor on insulator materials will enter and increasingly be used by manufacturing industry The wider use of semiconductor especially silicon on insulator materials will not only enable the benefits of these materials to be demonstrated but also will drive down the cost of substrates which in turn will stimulate the development of other novel devices and applications Thus the semiconductor on insulator materials of today are not only the basis for modern microelectronics but also for future nanoscale devices and ICs In itself this trend will encourage the promotion of the skills and ideas generated by researchers in the Former Soviet Union and Eastern Europe Indeed one of the goals of this Workshop is to promote the development of SOI technologies worldwide

Despite its small stature it occupies a central place both in everyday language and the philosophical lexicon. In allowing us to talk about hypothetical situations it raises a host of thorny philosophical puzzles about language and logic. Addressing them requires tools from linguistics, logic, probability theory and metaphysics. Justin Khoo uses these tools to navigate a maze of interconnected issues about conditionals, some of which include the nature of linguistic communication, the relationship between logical and natural languages and the relationship between different kinds of modality. According to Khoo's theory, conditionals form a unified class of expressions which share a common semantic core that encodes inferential dispositions. Thus, rather than represent the world, conditionals are devices used to communicate how we are disposed to infer. Khoo shows that this theory can be extended to predict the probabilities of conditionals as well as how different kinds of conditionals differ both semantically and pragmatically. Khoo's book will make for a significant contribution to the literature on conditionals and should be of interest to philosophers, linguists and computer scientists.
