Nanohybrid Catalyst based on Carbon Nanotube Rasel Das, 2017-05-23 This book introduces carbon nanotubes as a matrix for efficient nanohybrid catalysis. The preparation and use of such materials in ultra grade water purification is described. Simple chemical methods for purification and functionalization of carbon nanotubes prior to their use is also detailed. The author also discusses the potential use of nanotube based nanobiohybrid catalysts in the removal of organic pollutants.

Proceedings of International Conference on Sustainable Expert Systems Subarna Shakya, Valentina Emilia Balas, Wang Haoxiang, Zubair Baig, 2021-03-30 This book includes papers on intelligent expert systems and sustainability applications in the areas of data science, image processing, wireless communication, risk assessment, healthcare, intelligent social network mining, and energy. The recent growth of sustainability leads to a progressively new era of computing where its design and deployment leverages significant impact on the intelligent systems research. Moreover, the sustainability technologies can be effectively used in the progressive deployment of various network enabled technologies like intelligent sensors, smart cities, wearable technologies, robotics, web applications, and other such Internet technologies. The thrust of this book is to publish the state of the art research articles that deal with the design, development, implementation, and testing of the intelligent expert systems and also to provide an overview of the sustainable management of these systems.
