What is the best ROI methodology on P4P programs that you have evaluated and how does it work? Are tiered networks feasible in smaller markets?
- Industry Trends: Do you have a recommended reading level for translated written materials for preventative services in either low socio-economic status populations or for children? Also, is there a web site or written reference indicating how to do that? In this era of consumer-driven healthcare, what quality-related information helps consumers make informed choices about health plans or providers?
- eHealth Initiatives: What screening requirements do you use for telemedicine patients? Do you evaluate factors outside disease severity? Can you describe the kind of investment needed to implement e-health tools, how quickly you can achieve an ROI and what kind of ROIs you can expect? What criteria are payors and physicians using to determine whether or not an e-visit is billable? Are there clear-cut guidelines? - HIPAA Security and Privacy: What are the biggest challenges to offering single sign-on? How do you secure e-health physician-patient communication?
- Disease Management: How do strategies for asthma disease management differ for community-based health programs that target the underserved? What is your staff-to-patient ratio in your depression management program? How effective are physician-specific report cards in getting physicians in practice with the guidelines? Is there any other type of literature that would support the effectiveness as well? What is an accurate assessment of a member's readiness to change and how do you create interventions that are applicable to each member's stage of readiness? How are the health coaches trained and what kind of training gets them geared up to work with patients? What is the average amount of time a health coach spends per call per participant?
