Stary, 2013-10-22 Critical Evaluation of Equilibrium Constants Involving 8 Hydroxyquinoline and Its Metal Chelates presents and evaluates the published data on the solubility dissociation and liquid liquid distribution of oxine and its metal chelates to recommend the most reliable numerical data This book explores the dissociation constants of oxine in aqueous solutions Organized into four chapters this book begins with an overview of the characteristics of 8 hydroxyquinoline oxine This text then examines the total solubility of oxine in aqueous solution at different pH values Other chapters consider the distribution of oxine between an aqueous phase and an organic solvent which can be generally described by an equation where the bar indicates the organic phase species This book discusses as well the overall extraction constant involving metal chelate formation The final chapter deals with the overall stability constants of metal oxinate This book is a valuable resource for geochemists chemists scientists and research workers

Interfacial Chemistry of Rocks and Soils Noemi M. Nagy, Jozsef Konya, 2009-12-23 Knowledge of the basic interactions that take place between geological materials and different substances is the first step in understanding the effects of adsorption and other interfacial processes on the quality of rocks and soils and on driving these processes towards a beneficial or neutral result Interfacial Chemistry of Rocks and Soils exam

Ion Exchange and Solvent Extraction Jacob A.

Marinsky, Yitzhak Marcus, 2017-10-05 The Ion Exchange and Solvent Extraction series treats ion exchange and solvent extraction both as discrete topics and as a unified multidisciplinary study presenting new insights for researchers in many chemical and related fields. Containing current knowledge and results in ion exchange, this text presents an overview of the chemical thermodynamics of cation exchange reactions with particular emphasis placed on liquid phase and solid phase activity coefficient models. It describes the development of surface complexation theory and its application to the ion exchange phenomenon, discusses metal natural colloid surface reactions and their consideration by surface complexation modelling, complements and covers the influence of humic substances on the uptake of metal ions by naturally occurring materials.

Ionisation Constants of Inorganic Acids and Bases in Aqueous Solution D. D. Perrin, 2016-09-14 *Ionisation Constants of Inorganic Acids and Bases in Aqueous Solution* Second Edition provides a compilation of tables that summarize relevant data recorded in the literature up to the end of 1980 for the ionization constants of inorganic acids and bases in aqueous solution. This book includes references to acidity functions for strong acids and bases as well as details about the formation of polynuclear species. This text then explains the details of each column of the tables wherein column 1 gives the name of the substance and the negative logarithm of the ionization constant and column 2 gives the temperature of measurements in degree Celsius. This book presents as well the method of measurement and the literature references that are listed alphabetically at the end of the tables. Chemists will find this book useful. **The Publishers' Trade List Annual**, 1985
