Engineering Management, A: Learning, Adapting And Creating Value Robert J Aslett, John M Acken, Siva K Yerramilli, 2021-02-02 Today a prosperous technology company can be disrupted and put out of business in a blink of an eye The development of many different technologies that once took years can be done in months or weeks There are also few examples where the engineering work is completely contained in one company or one engineering organization Business strategies have evolved The analysis of competitive forces in an industry has matured to include the concepts of disruptive innovation and cooptation In an ecosystem characterized by rapid changes in technology and how it is developed an engineering R D organization will quickly become irrelevant if it fails to keep the pace of innovation needed to succeed This book provides readers with a holistic approach to engineering management We have seen that successful managers create a strong foundation of a common culture that enables learning value creation diversity and inclusion They create organizations that tightly connect the core engineering functions of strategic planning research and development and are able to comprehend and direct a broader R D system that stretches well beyond their own organization's boundary Doing all of this to extract the greatest value in the least amount of time is what we call holistic engineering management The content for this book is based on over 105 years of combined experience working in a rapidly changing industry In most chapters practical examples and case studies of the concepts provided are given As noted in the foreword by Pat Gelsinger CEO VMware and in comments from other technology leaders Aart de Geus Chairman and co CEO Synopsys Inc Aicha Evans CEO Zoox Inc William M Holt former Executive VP GM Intel Corp and Amir Faintuch Senior VP GM GlobalFoundries Inc this book will be valuable for students of engineering management and current engineering managers **Lithium-Ion Cells** Yuri Koshtyal, Alexander Rumyantsev, 2024-12-24 A large quantity of articles and books have been published on the designated topics

However most of the literary sources describe the results of scientific articles on the synthesis and study of perspective materials reveal circuit and design solutions for constructing control systems and manufacturing batteries and are educational materials At the same time a small part of the published sources includes the following descriptions of materials produced industrially and used in the LIC manufacturing process demonstrations of the industrially produced LIC energy and power parameters analysis of the characteristics of manufactured miniature lithium ion cells solid state LICs lithium metal cells and all solid state cells as well as others Considering the popularity of the discussed topics one can hope to find detailed information on the Internet Indeed modern search engines make it possible to locate a sufficiently large number of relevant documents However while conducting such research we encountered the following challenges the data are somewhat fragmented and their systematization and structuring are required search results do not always meet search queries For instance data that were relevant to the topic were found but they did not match the query as accumulated data grow the search time for new information extends the choice of search engine and location different countries affects search results the data are not indexed in search engines although the correct keywords and website were requested the information disappears due to website updates and the found data require additional processing For example many presentations show changes in the shape of the discharge curves depending on the discharge current strength In addition however Ragone plots are necessary for a correct comparison and therefore the mathematical processing of presented results is required Thus this book was written to systematize and structure information on industrially produced materials for LIC manufacturing and industrially produced and promising LICs and lithium metal rechargeable cells for various applications

The Value Trail
Marc Sanso, 2016-03-03 The Value Trail offers a comprehensive approach to competitive analysis and strategy considering value as a central theme and from a customer based perspective It fully develops a disruptive new model of strategic analysis namely the Three Dimensions of Value model that approaches the drivers of success within a business from a value based perspective how value is understood by the customer Appreciation of Value and how it is boosted Concentration of Value or subtracted Predation of Value by different business agents From this business level perspective the book progressively moves down to a company level to allow the reader to understand how companies can set corporate goals and leverage internal resources to deliver successful value propositions To close the circle special attention is paid to the definition of an integrated monitoring system based on both market outside in perspective and company inside out perspective metrics On top of that the book also identifies in line with this new theory the most relevant existing competitive models together with a comprehensive analysis of their strategic approach and success drivers If you are an entrepreneur looking for a solid and understandable guide to fully cover all company stages a manager seeking to improve the implementation of operational and strategic processes or a practitioner in search of a disruptive approach to competitive analysis this is the book you've been waiting for
