Boyer,2022-09-15 Austria 1867 1955 connects the political history of German speaking provinces of the Habsburg Empire before 1914 Vienna and the Alpine Lands with the history of the Austrian Republic that emerged in 1918 John W Boyer presents the case of modern Austria as a fascinating example of democratic nation building The construction of an Austrian political nation began in 1867 under Habsburg Imperial auspices with the German speaking bourgeois Liberals defining the concept of a political people Volk and giving that Volk a constitution and a liberal legal and parliamentary order to protect their rights against the Crown The decades that followed saw the administrative and judicial institutions of the Liberal state solidified but in the 1880s and 1890s the membership of the Volk exploded to include new social and economic strata from the lower bourgeoisie and the working classes Ethnic identity was not the final structuring principle of everyday politics as it was in the Czech lands Rather social class occupational culture and religion became more prominent variables in the sortition of civic interests exemplified by the emergence of two great ideological parties Christian Socialism and Social Democracy in Vienna in the 1890s The war crisis of 1914 1918 exploded the Empire with the Crown self destructing in the face of military defeat chronic domestic unrest and bitter national partisanship But this crisis also accelerated the emergence of new structures of democratic self governance in the German speaking Austrian lands enshrined in the republican Constitution of 1920 Initial attempts to make this new project of democratic nation building work failed in the 1920s and 1930s culminating in the catastrophe of the 1938 Nazi occupation After 1945 the surviving legatees of the Revolution of 1918 reassembled under the four power Allied occupation which fashioned a shared political culture which proved sufficiently flexible to accommodate intense partisanship resulting by the 1970s in a successful republican system organized under the aegis of elite democratic and corporatist negotiating structures in which the Catholics and Socialists learned to embrace the skills of collective but shared self governance Political and Military Leadership in the World Wars Carl Cavanagh Hodge,2021-03-16 This book approaches the World Wars and the decades between them as a single unit in modern history It is impossible to understand either the cause or conduct of the 1939 45 war without an appreciation of the issues not wholly answered in the conflict of 1914 18 Bridging the World Wars was the establishment revision and ultimate collapse of the Versailles settlement and the League of Nations system between 1919 and 1939 The 1919 settlement was contested in the 1920s by Fascist Italy and began to unravel irreparably in 1931 with Japan s incursion into Manchuria The strategic thought of the interwar years is therefore especially instructive in assessing the prosecution of WWII as the military ventures of these

two revisionist powers pointed toward future developments even before Germany thrust a new way of war upon Eastern and Western Europe Meanwhile Britain France and the United States began an incremental conversion to new approaches to war in the air and on the sea in particular The interwar decades are best understood as a period of calibrated rearmament by all the powers based on assumptions about the probability of a future war and the nature of its prosecution **War, Strategy and the Modern State, 1792-1914** Carl Cavanagh Hodge, 2016-11-25 This book is a comparative study of military operations conducted by modern states between the French Revolution and World War I It examines the complex relationship between political purpose and strategy on the one hand and the challenge of realizing strategic goals through military operations on the other It argues further that following the experience of the Napoleonic Wars military strength was awarded a primary status in determining the comparative modernity of all the Great Powers that military goals came progressively to distort a sober understanding of the national interest that a genuinely political and diplomatic understanding of national strategy was lost and that these developments collectively rendered the military and political catastrophe of 1914 not inevitable yet probable

William McKinley versus William Jennings Bryan John M. Pafford, 2020-09-01 The clashes between William McKinley and William Jennings Bryan during the 1896 and 1900 presidential elections changed the course of American politics Prior to Bryan's candidacy the Democratic Party was slightly more conservative than the Republican Party At the 1896 Democratic National Convention Bryan's dramatic Cross of Gold speech stampeded the delegates left of center a position the party has traditionally held since Most Americans though rejected this new wave remained conservative and twice elected McKinley These were dramatic years for the country as it continued its rise to become a major world economic and military power Significantly freedom increased for those now within the American orbit

Blood and Iron Katja Hoyer, 2021-12-07 In this vivid fifty year history of Germany from 1871-1918 which inspired events that forever changed the European continent here is the story of the Second Reich from its violent beginnings and rise to power to its calamitous defeat in the First World War Before 1871 Germany was not yet a nation but simply an idea Its founder Otto von Bismarck had a formidable task at hand How would he bring thirty nine individual states under the yoke of a single Kaiser How would he convince proud Prussians Bavarians and Rhinelanders to become Germans Once united could the young European nation wield enough power to rival the empires of Britain and France all without destroying itself in the process In this unique study of five decades that changed the course of modern history Katja Hoyer tells the story of the German Empire from its violent beginnings to its calamitous defeat in the First World War This often startling narrative is a dramatic tale of national self discovery social upheaval and realpolitik that ended as it started in blood and iron

Geopolitics and the Quest for Dominance Jeremy Black, 2015-11-25 History and geography delineate the operation of power not only its range but also the capacity to plan and the ability to implement Approaching state strategy and policy from the spatial angle Jeremy Black argues that just as the perception of power is central to issues of power so place and its

constraints and relationships is partly a matter of perception not merely map coordinates Geopolitics he maintains is as much about ideas and perception as it is about the actual spatial dimensions of power Black s study ranges widely examining geography and the spatial nature of state power from the 15th century to the present day He considers the rise of British power geopolitics and the age of Imperialism the Nazis and World War II and the Cold War and he looks at the key theorists of the latter 20th century including Henry Kissinger Francis Fukuyama and Samuel P Huntington Philip Bobbitt Niall
