Spatial Health Inequalities Esra Ozdenerol, 2016-08-05 The neighborhoods and the biophysical political and cultural environments all play a key role in affecting health outcomes of individuals Unequal spatial distribution of resources such as clinics hospitals public transportation fresh food markets and schools could make some communities as a whole more vulnerable and less resilient to adverse health effects This somber reality suggests that it is rather the question of who you are depends upon where you are and the fact that health inequality is both a people and a place concern That is why health inequality needs to be investigated in a spatial setting to deepen our understanding of why and how some geographical areas experience poorer health than others This book introduces how spatial context shapes health inequalities
