Report of the National Conference on Weights and Measures, 1953 *Report of the ... National Conference on Weights and Measures* National Conference on Weights and Measures, 1957 Advanced Guidelines for Performance Testing of Two-legged Longwall Shields Thomas M. Barczak, 1989 Guidelines for the Supplementary Load Testing of Bridges The Institution of Civil Engineers. National Steering Committee for the Load Testing of Bridges, 1998

Bridge authorities in the UK are currently facing a large programme of bridge assessment and strengthening This has been caused in part by the necessity of ensuring that the European Union deadline for allowing 40 tonne lorries on to UK roads can be met Many bridges have failed theoretical assessments and some bridge owners frustrated by the fact that many failed structures are apparently in good condition and showing no signs of distress have resorted to load testing their bridges to try to provide additional information A National Steering Committee for the Load Testing of Bridges was set up to examine the role of bridge load testing as a tool for assisting the assessment process The National Steering Committee consists of representatives from all major bridge owners including the Highways Agency the County Surveyors Society the London Bridges Engineering Group Railtrack and the British Waterways Board It also includes representatives from consulting engineers and universities and has the support of the Institution of Civil Engineers The overall objective of the National Steering Committee was to produce authoritative guidance on load testing techniques which could be used by the practising engineer to determine capacities of existing bridges structures that are safe prudent and minimize levels of restriction to the transport infrastructure In June 1995 the committee appointed Rendel Palmer the level of risk both public safety and economic associated with load testing how to plan and carry out a load test including the level of expertise necessary the appropriate loading methods and the type and quantity of instrumentation required In addition the document is intended to be a source of information on load testing measuring equipment and specialist techniques that engineers can use for reference
