Bulletin of the Public Affairs Information Service, a Cooperative Clearing House of Public Affairs Information Public Affairs Information Service, 1916 **Public Affairs Information Service Bulletin**, 1916 *New York Politics* Edward V Schneier, Brian Murtaugh, 2015-01-28 Most New Yorkers have very little knowledge of how influence is wielded in Albany This acclaimed book offers a chance to look behind those closed doors The authors an Albany based political scientist and a former State Assembly member now joined by an expert on political blogging and networking infuse their discussion of institutions and processes with the drama and significance of real power politics Completely revised and updated with extensive new material the book covers recent political developments and electoral contests as well as all the basics constitutional issues historical economic social and demographic factors the functioning of executive legislative and judicial institutions urban local and special district governments parties interest groups and bureaucracies and finance budgets health education and welfare programs Throughout the authors are attentive to the many paradoxes and dualities that distinguish political social and economic life in the Empire State Local Autonomy as a Human Right Joshua B. Forrest, 2021-08-27 Local Autonomy as a Human Right contends that local communities struggle to preserve their territorial autonomy over time despite changes to the broader political and geographic contexts within which they are embedded Forrest argues that this both reflects and is evidence of a worldwide embrace of local control as a key political and social value indeed of such importance that it should be embraced and codified as a human right This study weaves together

evidence grounded in a variety of disciplines history geography comparative politics sociology public policy anthropology international jurisprudence rural studies urban studies to make clear that a presumed inherent moral right to local self determination has been manifested in many different historical and social contexts This book constructs a compelling argument favoring a human right to local autonomy It identifies practical factors that help to account for the relative success of communities that are able to assert local control over time Here particular attention is paid to whether localities are able to generate policy and organizational capacity Forrest suggests that a focus on local policy and organizational capacity can help to explain why some communities attempting to assert greater local control are more successful than others Local Autonomy as a Human Right contributes to scholarly debates regarding the varied impacts of globalization with the place based perspective and moral emphasis on territorial centered rights put forth herein offering a necessary counter narrative to the often presumed predominance of global forces
