Managerial Decision Modeling 6th Edition:

Managerial Decision Modeling Nagraj (Raju) Balakrishnan, Barry Render, Ralph Stair, Charles Munson, 2017-08-07 This book fills a void for a balanced approach to spreadsheet based decision modeling. In addition to using spreadsheets as a tool to quickly set up and solve decision models, the authors show how and why the methods work and combine the user's power to logically model and analyze diverse decision making scenarios with software based solutions. The book discusses the fundamental concepts, assumptions and limitations behind each decision modeling technique, shows how each decision model works and illustrates the real world usefulness of each technique with many applications from both profit and nonprofit organizations. The authors provide an introduction to managerial decision modeling, linear programming models, modeling applications and sensitivity analysis, transportation assignment and network models, integer goal and nonlinear programming models, project management, decision theory, queuing models, simulation modeling, forecasting models and inventory control models. The additional material files Chapter 12 Excel files for each chapter, Excel modules for Windows, Excel modules for Mac. 4th edition errata can be found at <https://www.degruyter.com/view/product/486941>

Managerial Decision Modeling

, 2002 *Managerial Decision Modeling* , 2020 **Foresight in Organizations** Patrick van der Duin, 2016-01-13 Foresight for Organizations will acquaint the reader with various foresight methods and tools to show the reader how these methods are used, what the pitfalls are and how the methods relate to each other. This innovative volume offers the reader the ability to carry out a study of the future by him or herself and apply the results in a decision making strategy process. The author addresses the following methods: scenarios, trend analysis, the Delphi method, quantitative trend extrapolation, technology assessment, backcasting and roadmapping, the most relevant and popular methods that also cover the range of approaches from predictive via normative to explorative. Every chapter also contains references to additional literature about the methods being discussed. This book is essential reading for researchers, academics and students in the areas of Community Development, Sociology of organizations, Change management, Social entrepreneurship, Sustainable development and participative planning.
