Managerial Fraud Executive Impression Management Beyond Red Flags:

Managerial Fraud Terry A. Sheridan, 2016 **Managerial Fraud** Terry A. Sheridan, 2016-05-13 Most frauds perpetrated by senior managers take longer to uncover than those by other occupational groups and they steal more. This is a serious problem world wide. Currently the Red Flag approach is used by auditors to prevent and uncover fraud and in some countries it is statutory. However the existing approach does not catch managerial fraudsters quickly or very often. In *Managerial Fraud* Dr Terry Sheridan reports the findings of her study of fraudulent executives. Her work illuminates the particular methods fraudsters employ to appear more authentic than the average person and reveals two types of executive fraudster with very different behaviours. All this helps to explain why the current Red Flag approach fails to identify potential fraudsters and instead tends to focus on Red Flag executives who are negative characters but non fraudulent and accounts for the problem auditors face who see Red Flag indicators and are obliged to conduct further audits yet find nothing of substance. During the author's research the innocent colleagues who worked closely with fraudulent managers have for the first time been interviewed about their experiences and had their impressions analysed leading to the development of an innovative typology of fraudulent executives based on Impression Management Theory. Better understanding of what Dr Sheridan has uncovered might result in organisations being able to reduce their exposure to fraud perpetrated by their own senior management.

Business Threats and Opportunities in the Western Balkans Hristina Runcheva Tasev, Elena Makrevska Disoska, 2021-10-15 This book provides a comprehensive outlook of expected long term economic changes in the Western Balkans inspiration for involved decision makers and ways to leverage the opportunities of the COVID 19 pandemic. It considers how the organizational aspects of enterprises changes in consumer behavior the rise of informational technologies and the expansion of the digital market can create economic growth based on lower carbon consumption and sustainable growth based on green and clean solutions. The length and depth of the current economic crisis will depend on a combination of effective policies incentives and management systems that can balance between the protection of public health and economic well being.

Malevolent Managers Terry A. Sheridan, 2017-05-15 Dr Terry A Sheridan employs a new and unique theoretical perspective to examine how malevolent tyrannical and mediocre managers commonly use violence in the workplace not necessarily physical violence but bullying overt and covert emotional abuse all forms of negative behaviour that are damaging to individuals and organisations. The theoretical basis for the author's analysis and prescriptions is the new perspective of Executive Impression Management which stems from Dr Sheridan's research into the differences between a number of types of executives from their co workers point of view. That investigation developed indicators to identify different negative management types and also helped define what has been called respectful management the sort exercised by those managers who are good stewards. What makes this book unusual is that it is derived from qualitative research and covers an area where hardly any scholarly work has been produced. The author argues that the research methodology

employed has resulted in a better understanding of impression management than has hitherto been possible It addresses the confusion that often abounds regarding who is a good or bad manager and the fact that we can identify bad management through measures of company or organisational performance but not how and why it went wrong It will assist the leadership of organisations to make the right decisions about recruitment and promotion and to identify and challenge poor performance effectively
