Microeconomics Int I Edition By Rubinfeld:

Beyond Profit and Self-interest Robert Scott Gassler, 2003 Gassler economics Vrije U Brussels tries to establish some order in the chaos he sees resulting from economists expanding their portfolio to deal with just about everything in society. He does not offer a new theory but reformulates existing theory to make it more applicable across disciplines, illuminate its limitations and point out necessary extensions. It shows its successes and provides some new extensions of his own. First he sets out the scope, method, foundations and taxonomy of the theory, then he surveys applications in such contexts as interactions, non-profits and planets. He writes for upper division graduate and professional economists who are conversant in intermediate microeconomic theory, multivariable calculus and statistics. International Business Success in a Strange Cultural Environment Mamarinta P. Mababaya, 2003. The book focuses on the cultural aspect of the author's published PhD thesis entitled 'The Role of Multinational Companies in the Middle East: The Case of Saudi Arabia', which he has carried out at the University of Westminster. It explores the success of multinational enterprises doing business in Saudi Arabia vis-à-vis their cultural awareness and responsiveness. The empirical findings discussed in this book reveal that international business success in a strange cultural environment depends partly on the ability of multinational managers to understand the local culture. The cultural subject in this book pertains to Islam in its entirety. The findings may seem strange to many readers who are not familiar with Islamic culture in its purest form. Many newcomers to Saudi Arabia, especially non-Muslim foreign investors, businessmen and workers, often find many things strange about the Kingdom, its people and cultural values. Some feel it odd that many Muslims give more importance to prayer than business. Some are disappointed when they find commercial establishments like shopping centres closed as Muslim workers go to the mosques to attend to their daily prayers. Business visitors find strange the fact that in the midst of their meetings with their Saudi or Muslim counterparts, the latter excuse themselves for prayer. They have these strange feelings due to their lack of understanding of true Islamic culture. The cultural aspect of this book will help businessmen and concerned institutions worldwide gain understanding of Islam and reconcile their cultural differences with the Muslim world. Through this book, international companies will be able to have a better understanding of authentic Islamic culture, which will help them gain greater competitive advantages in the Saudi marketplace.

Principles of Conflict Economics Charles H. Anderton, John R. Carter, 2009-03-16. Conflict economics contributes to an understanding of violent conflict in two important ways. First, it applies economic analysis to diverse conflict activities such as war, arms races and terrorism, showing how they can be understood as purposeful choices responsive to underlying incentives. Second, it treats appropriation as a fundamental economic activity, joining production and exchange as a means of wealth acquisition. Drawing on a half-century of scholarship, this book presents a primer on the key themes and principles of conflict economics. Although much work in the field is abstract, the book is made accessible to a broad audience of scholars, students and policymakers by relying on historical data.

relatively simple graphs and intuitive narratives In exploring the interdependence of economics and conflict the book presents current perspectives of conflict economics in novel ways and offers new insights into economic aspects of violence

The Role of Multinational Companies in the Middle East Mamarinta P. Mababaya, 2002 This study investigated whether known economic and international business theories available in the literature are meaningful enough to explain the nature existence and role of multinational companies MNCs in the Middle East particularly Saudi Arabia Two sets of questionnaires were distributed in major cities of Saudi Arabia one set for 100 multinational managers and another for 280 multinational customers 234 questionnaires were collected 45 from multinational managers and 189 from customers This represents a total response rate of 62 percent which is adequate for this study The empirical results supported with comprehensive secondary data confirmed virtually all of the research hypotheses The study found that joint ventures are the dominant form of multinational business in Saudi Arabia both in manufacturing and service industries The core roles of MNCs in the Saudi foreign ventures are evident in the cross border value adding activities of marketing trading manufacturing consulting contracting project management insurance hotel operation and banking Likewise MNCs provide licensing franchising financing services and various auxiliary roles in the Kingdom Therefore the multinationality of a firm or a group of firms operating across national boundaries is not necessarily synonymous with international production the main subject of contemporary multinational theories The respondents generally perceived the competitiveness of MNCs operating in Saudi Arabia as a function of a number of economic management marketing technological and other variables They also perceived the contributions of MNCs to the Kingdom's socio economic developments as significant and positive The study also found that understanding Islamic values and ethics is important for MNCs In this regard the researcher looked at some objective indicators of business success and related them to selected measures of MNCs local cultural awareness and responsiveness The results indicate that the business success of multinationals operating in Saudi Arabia is positively related to their local cultural awareness and responsiveness Along this line this study covers some vital elements of Islamic culture which will help MNCs understand further the cultural needs values and sensitivities of the Saudi people and Muslims in general
