

Advanced Manual

Introduction

This manual is your step-by-step guide to all the advanced features found on your Mustang™ Mini amplifier. For free downloads and information on using Fender® FUSE™ software, please visit fuse.fender.com.

Using Presets

Turn the PRESET knob to select one of 24 presets. Presets are stored in three banks, colored AMBER, GREEN and RED, in the following order:

Each preset is based on one of the eight amplifier types labeled next to each of the preset LEDs. Each preset stores the settings for every parameter on the amplifier (volume, tone, effects, etc.) except for the master volume level which can only be adjusted by turning the MASTER knob manually.

The RED and GREEN banks are for storing your own custom presets. The AMBER bank of presets can only be modified using Fender® FUSE™ software, available free of charge at fuse.fender.com.

Programmable Knobs

The four programmable knobs (GAIN, VOLUME, TREBLE, EFFECTS) will NOT show their true settings when you first select a new preset. This is because the stored preset setting for each knob can be different from the position that the knob is currently pointing to.

Simply turn a knob to activate it and adjust its current setting. The knob will remain active until you select a different preset, at which time the programmable knobs all become inactive again.

Rotate programmable knobs to activate

You may hear a significant change in volume or tone when you first turn a programmable knob as the preset setting for the knob instantly shifts to the activated knob position.

The only way to see what the level of a programmable knob is BEFORE you turn it is by using Fender FUSE software.

Tone Adjustments (Treble and Bass)

Turn the TREBLE knob to adjust the high-frequency tone of the Mustang Mini amplifier. To adjust the low-frequency BASS tone, press and hold the EXIT button while turning the TREBLE knob:

Effects

Effect Selections

Turn the EFFECTS knob to select one of 12 effects. Select "OFF" for no effects.
