Section III highlights research on emotions in academic content domains: mathematics, science and reading/writing. Contextual factors: classroom, family and culture, and teacher emotions. Cumulated Index Medicus, 1994 **Fostering Development in Midlife and Older Age** Irina Catrinel Crăciun, 2023-02-22 This handbook integrates and discusses a growing evidence base concerning individual development across middle and late adulthood. The book includes a comprehensive analysis of what growth implies within midlife and older age and considers how different developmental areas are intertwined, i.e. physical, cognitive, social and emotional development as well as personality growth. As the gap between theory and practice still constitutes an issue in developmental research, the handbook also aims to provide illustrative examples of prevention and intervention from a positive psychology perspective. These were selected to represent a variety of topics relevant for individual development where research informs practice, ranging from happiness, grandparenthood, love and sexuality to loneliness, depression, anxiety, suicide prevention and coping with death. This handbook is a must-have.
