America Ascendant Stanley B. Greenberg, 2015-11-03 America is poised to lead the 21st Century as it led the 20th That will happen because the country is at a tipping point in the battle for its own renewal a renewal that will allow America to be exceptional again Our economy is on the move fueled by revolutions in energy immigration innovation big data and advanced manufacturing America s energy independence has set off shockwaves Just as important are the social transformations that are making the country ever more racially and culturally diverse younger a home to immigrants and the metropolitan centers that foster a rising economic and cultural dynamism While most other countries struggle profoundly with immigration and religious and racial differences America s on a path to multicultural identity Those revolutions in the economy society and culture and are also producing a new American majority that embraces new values and new politics Republicans are waging a counter revolution and that is why America looks gridlocked and why the country is turning to Democrats to take on the country s growing challenges The economic and social transformations leave people struggling to earn enough and reach the middle class Families are under stress Government is corrupted by big money The American public is demanding the country address the dark side of our progress and reforms are starting to happen That is why Democrats will get to lead an era of reform and renewal comparable to the progressive era that mitigated the excesses of the Industrial Revolution In this incisive book expert strategist Greenberg draws on years of research and polling to illuminate how America is far from being gridlocked and he articulates a powerful vision of how American politics and America can be renewed [Educart NEET 37 Years Physics Solved Papers \(PYQs\) Chapterwise and Topicwise for NEET 2025 Exam](#) Educart, Dr. Rakshita Singh, 2024-07-25

Educart, Dr. Rakshita Singh, 2024-07-25 [The Complacent Class](#) Tyler Cowen, 2017-02-28 A Wall Street Journal and Washington Post Bestseller Tyler Cowen s blog Marginal Revolution is the first thing I read every morning And his brilliant new book The Complacent Class has been on my nightstand after I devoured it in one sitting I am at round the clock Cowen saturation right now Malcolm Gladwell Since Alexis de Tocqueville restlessness has been accepted as a signature American trait Our willingness to move take risks and adapt to change have produced a dynamic economy and a tradition of innovation from Ben Franklin to Steve Jobs The problem according to legendary blogger economist and best selling author Tyler Cowen is that Americans today have broken from this tradition we re working harder than ever to avoid change We re moving residences less marrying people more like ourselves and choosing our music and our mates based on algorithms that wall us off from anything that might be too new or too different Match com matches us in love Spotify and Pandora match us in music Facebook matches us to just about everything else Of course this matching culture brings tremendous positives music we like partners who make us happy neighbors who want the same things We re more comfortable But according to Cowen there are significant collateral downsides attending this comfort among them heightened inequality and segregation and

decreased incentives to innovate and create The Complacent Class argues that this cannot go on forever We are postponing change due to our near sightedness and extreme desire for comfort but ultimately this will make change when it comes harder The forces unleashed by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis impossibly expensive rentals for our most attractive cities worsening of residential segregation and a decline in our work ethic The only way to avoid this difficult future is for Americans to force themselves out of their comfortable slumber to embrace their restless tradition again

Shareholder Cities Sai Balakrishnan, 2019-11-01 Economic corridors ambitious infrastructural development projects that newly liberalizing countries in Asia and Africa are undertaking are dramatically redefining the shape of urbanization Spanning multiple cities and croplands these corridors connect metropolises via high speed superhighways in an effort to make certain strategic regions attractive destinations for private investment As policy makers search for decentralized and market oriented means for the transfer of land from agrarian constituencies to infrastructural promoters and urban developers the reallocation of property control is erupting into volatile land based social conflicts In Shareholder Cities Sai Balakrishnan argues that some of India's most decisive conflicts over its urban future will unfold in the regions along the new economic corridors where electorally strong agrarian propertied classes directly encounter financially powerful incoming urban firms Balakrishnan focuses on the first economic corridor the Mumbai Pune Expressway and the construction of three new cities along it The book derives its title from a current mode of resolving agrarian urban conflicts in which agrarian landowners are being transformed into shareholders in the corridor cities and the distributional implications of these new land transformations Shifting the focus of the study of India's contemporary urbanization away from megacities to these in between corridor regions Balakrishnan explores the production of uneven urban development that unsettles older histories of agrarian capitalism and the emergence of agrarian propertied classes as protagonists in the making of urban real estate markets Shareholder Cities highlights the possibilities for a democratic politics of inclusion in which agrarian urban encounters can create opportunities for previously excluded groups to stake new claims for themselves in the corridor regions

Transport Justice Karel Martens, 2016-07-01 Transport Justice develops a new paradigm for transportation planning based on principles of justice Author Karel Martens

starts from the observation that for the last fifty years the focus of transportation planning and policy has been on the performance of the transport system and ways to improve it without much attention being paid to the persons actually using or failing to use that transport system There are far reaching consequences of this approach with some enjoying the fruits of the improvements in the transport system while others have experienced a substantial deterioration in their situation The growing body of academic evidence on the resulting disparities in mobility and accessibility have been paralleled by increasingly vocal calls for policy changes to address the inequities that have developed over time Drawing on philosophies of social justice Transport Justice argues that governments have the fundamental duty of providing virtually every person with adequate transportation and thus of mitigating the social disparities that have been created over the past decades Critical reading for transport planners and students of transportation planning this book develops a new approach to transportation planning that takes people as its starting point and justice as its end

Our Social World Jeanne H. Ballantine, Keith A. Roberts, Kathleen Odell

Korgen,2016-11-30 Inspire your students to develop their sociological imaginations in Our Social World Focused on deep learning rather than memorization this book encourages readers to analyze evaluate and apply information about the social world to see the connection between the world and personal events from a new perspective and to confront sociological issues on a day to day basis Organized around the Social World Model a conceptual framework used across chapters to see the complex links between various micro to macro levels of the social system students will develop the practice of using three levels of analysis and to view sociology as an integrated whole rather than a set of discrete subjects **Asymmetric Crisis in Europe and Possible Futures** Johannes Jäger,Elisabeth Springler,2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics **The Land Is Sung** Thomas M. Rare Earth Frontiers Julie M. Klinger,2018-01-15 *Rare Earth Frontiers* is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation

City Limits Jane-Frances Kelly,Paul Donegan,2015-03-02 Our bush heritage helped to define our identity but today Australia is a nation of cities A higher proportion of Australians live in cities than almost any other country and most of our national wealth is generated in them For most of the twentieth century our cities gave us some of the highest living standards in the world But they are no longer keeping up with changes in how we live and how our economy works The distance between where people live and

where they work is growing fast The housing market isn't working locking many Australians out of where and how they'd like to live The daily commute is getting longer putting pressure on social and family life and driving up living costs Instead of bringing us together Australia's cities are dividing Australians between young and old rich and poor the outer suburbs and the inner city Neglecting our cities has real consequences for our lives now and for our future prosperity Using stories and case studies to show how individuals families and businesses experience life in cities today this book provides an account of why Australia's cities are broken and how to fix them

In Sickness and in Wealth Carol Chan, 2018-08-10 Villagers in Indonesia hear a steady stream of stories about the injuries abuses and even deaths suffered by those who migrate in search of work So why do hundreds of thousands of Indonesian workers continue to migrate every year Carol Chan explores this question from the perspective of the origin community and provides a fascinating look at how gender faith and shame shape these decisions to migrate Villagers evaluate men's and women's migrations differently leading to different ideas about which kinds of human or financial flows should be encouraged and which should be discouraged or even criminalized Despite routine and well documented instances of exploitation of Indonesian migrant workers some villagers still emphasize that a migrant's success or failure ultimately depends on that individual's morality fate and destiny Indonesian villagers construct strategies for avoiding migration related risks that are closely linked to faith and belief in supernatural agency These strategies shape the flow of migration from the country and help to ensure the continued confidence Indonesian people have in migration as an act of promise and hope
