Reading Across International Boundaries Roger Openshaw, Janet Soler, 2007-06-01 Reading Across International
Boundaries edited by Roger Openshaw and Janet Soler clearly demonstrates these broader characteristics of debates about
the teaching of reading It sets the educational issues firmly in the context of the social cultural and political dynamics that
inform and animate them and give them their meaning It does so by setting out to understand their historical and
comparative dimensions Establishing the historical context highlights the origins and also the longevity of the problems and
conflicts that are now widely familiar The comparative approach also gives purchase on the wide range of approaches taken
to these issues in nations around the world More than this however this collection takes us into the realm of international
influences It underlines how debates in this area are not simply national but are international and global in their scale
Moreover this is the case not only in relation to the broad fabric of policy debate but also in the everyday struggles of pupils
parents and teachers in schools classrooms and homes Such an agenda is unsettling and provocative It has the potential to
challenge received opinion to hustle preconceptions It may also propose alternative visions for the improvement of teaching
in this area that might be taken up and taken seriously in different localities or even more broadly Most of all it enables us to
enrich and broaden our understanding of the learning and the teaching of reading at a time when awareness and vision are
sorely needed This collection of articles by leading scholars based in several different countries will be a significant
contribution to the research field but also a major resource when put to good use by policy makers and practitioners as it
should surely be **Contested Curriculum** Don Romesburg, 2025-04-15 Today many states have proposed so called Don't
