**Databases for Cardiology** G.T. Meester, F. Pinciroli, 2012-12-06 A database is in principle just a large collection of related or separate data systematically stored in a computer It should be possible for the data to be easily entered into the database structure and afterwards also easily read corrected and processed The later analysis of data from such a database is greatly enhanced by the availability of special query languages and statistical analysis programs not only for serial items but also for large combinations of data Query languages such as SQL Structured Query Language developed especially for these purposes make databases easily accessible also to researchers who may not be very well versed in computer programming The cardiological medical clinician and researcher of today is of necessity confronted more and more with computer based data storage Interest is of course

focused primarily on the clinical use of such databases more than on the technical design itself except for some very specific personalized applications For the latter approach there are at present many software packages commercially available especially designed for use in the personal computer environment This book is comprised out of a number of contributions by various authors with differing backgrounds and from many different countries The editors being a cardiologist and an information scientist have strived to achieve an equilibrium between these two fields The chapters in this book form a cross section of the many approaches to database design and implementation in the area of cardiology     *School and Home Guide to IBM-compatible Personal Computers* Everett Murdock,Susan Sudbury,1985 Answers Questions As to What Is Is Not IBM Compatible Includes an Index of Products Features Designed for IBMs IBM Compatibles     **Field Guide to PCs** Stephen L.
