A Journey in Mathematics Education Research Erna Yackel, Koen Gravemeijer, Anna Sfard, 2010-11-30 Our objective is to publish a book that lays out the theoretical constructs and research methodologies within mathematics education that have been developed by Paul Cobb and explains the process of their development We propose to do so by including papers in which Cobb introduced new theoretical perspectives and

methodologies into the literature each preceded by a substantive accompanying introductory paper that explains the motivation rationale for developing the new perspectives and or methodologies and the processes through which they were developed and Cobb s own retrospective comments In this way the book provides the reader with heretofore unpublished material that lays out in considerable detail the issues and problems that Cobb has confronted in his work that from his viewpoint required theoretical and methodological shifts advances and provides insight into how he has achieved the shifts advances The result will be a volume that in addition to explaining Cobb s contributions to the field of mathematics education also provides the reader with insight into what is involved in developing an aggressive and evolving research program When Cobb confronts problems and issues in his work that cannot be addressed using his existing theories and frameworks he looks to other fields for theoretical inspiration A critical feature of Cobb s work is that in doing so he consciously appropriates and adapts ideas from these other fields to the purpose of supporting processes of learning and teaching mathematics He does not simply accept the goals or motives of those fields As a result Cobb reconceptualizes and reframes issues and concepts so that they result in new ways of investigating exploring and explaining phenomena that he encounters in the practical dimensions of his work which include working in classrooms with teachers and with school systems The effect is that the field of mathematics education is altered Other researchers have found his new ways of looking useful to them And they in turn adapt these ideas for their own use The complexity of many of the ideas that Cobb has introduced into the field of mathematics education can lead to a multiplicity of interpretations by practitioners and by other researchers based on their own experiential backgrounds Therefore by detailing the development of Cobb s work including the tensions involved in coming to grips with and reconciling apparently contrasting perspectives the book will shed additional light on the processes of reconceptualization and thus help the reader to understand the reasons mechanisms and outcomes of researchers constant pursuit of new insights

Effective Alternative Assessment Practices in Higher Education Antione D. Tomlin, Christine M. Nowik, 2024-03-01 COVID 19 and increased attention to how institutions of higher education IHEs serve an increasingly diverse student population have brought conversations about standard practices from the margins to the center as faculty explore how to improve learning and student success for all students Historically IHEs were built by a privileged class for a privileged class a system and structure built on specific epistemologies practices and habits of mind and language that replicate privilege and leave many students underserved in their academic pursuits One way faculty have increased equity in their college classrooms is through the use of alternative assessment alt assessment practices This volume aims to share the experiences of faculty who have leveraged non traditional grading paradigms for the sake of increasing student learning a sense of belonging and equity in their classrooms Meant to orient faculty who are considering how to implement alt assessment in their own classes as well as those who are already employing various grading frameworks this volume will celebrate new and innovative approaches share lessons learned and invite a broader coalition of faculty into the stream of conversation about pedagogical innovation Faculty educators and

practitioners share their approaches to alternate assessment in this volume as well as the critiques lessons and outcomes associated with their pedagogical decisions Written by practitioners for practitioners we hope the book will provide theoretical and practical guidance for alternative assessment practices such as ungrading contract grading standards based grading and labor based grading across various disciplines and within different academic contexts
