

## NEKTA MANAGEMENT SYSTEM

Nekta is a company that deals with beekeeping and selling of honey. The company offers the following services:

- selling of beehives and associated accessories to bee farmers;
- setting up of the beehives for the bee farmers;
- offering of training on beekeeping;
- buying of honey-related products from farmers for resale.

The company sells beekeeping accessories in three packages namely: single hive, mini package and full package as per the following descriptions:

- A single hive is one beehive and its associated accessories for setting up.
- A mini package consists of six beehives, harvesting accessories, beehive setting up and training for one person for one day.
- A full package consists of twelve beehives and a honey extractor. It also includes training for two people for one day and honey harvesting kit for two people.

The cost of each of the packages is as shown in **Table 1**:

**Table 1: Cost of the Packages**

Package	Cost per package (KSh)
Single hive	15,000
Mini package	120,000
Full package	190,000

Other services offered by the company are:

- training at a cost of KSh 7,000 per person;
- sale of accessories at KSh 2,500 per unit;
- sale of honey harvesting kits at KSh 600 per unit;
- sale of honey extractors at KSh 13,000 per unit.

The company also buys honey from farmers at KSh 900 per kg and bee products at KSh 1,200 per kg, for further processing and subsequent sales to consumers. A farmer whose sales is below KSh 20,000 is paid in cash, while sales between KSh 20,000 and KSh 80,000 are paid by mobile money transfer. Any sales exceeding KSh 80,000 are paid via Electronic Funds Transfer (EFT).

Lang, Patsy Wang-Iverson, 2015-12-18 is a unique collection of papers illustrating the connections between origami and a wide range of fields. The papers compiled in this two-part set were presented at the 6th International Meeting on Origami Science, Mathematics and Education 10-13 August 2014 Tokyo, Japan. They display the creative melding of origami or more broadly folding with fields ranging from cell biology to space exploration, from education to kinematics, from abstract mathematical laws to the artistic and aesthetics of sculptural design. This two-part book contains papers accessible to a wide audience including those interested in art, design, history, and education, and researchers interested in the connections between origami and science, technology, engineering, and mathematics. Part 1 contains papers on various aspects of mathematics of origami: coloring, constructibility, rigid foldability, and design algorithms      Journal of Research of the National Bureau of Standards United States. National Bureau of Standards, 1988      Resources in Education, 1999-10      **Readings in Artificial Intelligence and Databases** John Mylopoulos, Michael L. Brodie, 1989 The interaction of database and AI technologies is crucial to such applications as data mining, active databases, and knowledge-based expert systems. This volume collects the primary readings on the interactions, actual and potential, between these two fields. The editors have chosen articles to balance significant early research and the best and most comprehensive articles from the 1980s. An in-depth introduction discusses basic research motivations, giving a survey of the history, concepts, and terminology of the interaction. Major themes, approaches, and results, open issues, and future directions are all discussed, including the results of a major survey conducted by the editors of current work in industry and research labs. Thirteen sections follow, each with a short introduction. Topics examined include semantic data models with emphasis on conceptual modeling techniques for databases and information systems and the integration of data model concepts in high-level data languages, definition and maintenance of integrity constraints in databases and knowledge bases, natural language front ends, object-oriented database management systems, implementation issues such as concurrency control and error recovery, and representation of time and knowledge incompleteness from the viewpoints of databases, logic programming, and AI      **Annotated Bibliography of the Literature on Resource Sharing Computer Networks** Helen M. Wood, Shirley Ward Watkins, Ira W. Cotton, 1976      **The Handbook of Market Design** Nir Vulkan, Alvin E. Roth, Zvika Neeman, 2013-08-29 Economists often look at markets as given and try to make predictions about who will do what and what will happen in these markets. Market design, by contrast, does not take markets as given; instead, it combines insights from

economic and game theory together with common sense and lessons learned from empirical work and experimental analysis to aid in the design and implementation of actual markets In recent years the field has grown dramatically partially because of the successful wave of spectrum auctions in the US and in Europe which have been designed by a number of prominent economists and partially because of the increase use of the Internet as the platform over which markets are designed and run There is now a large number of applications and a growing theoretical literature The Handbook of Market Design brings together the latest research from leading experts to provide a comprehensive description of applied market design over the last two decades In particular it surveys matching markets environments where there is a need to match large two sided populations to one another such as medical residents and hospitals law clerks and judges or patients and kidney donors It also examines a number of applications related to electronic markets e commerce and the effect of the Internet on competition between exchanges
