Copyright Office, 1977 **Evidence, Explanation, and Realism** Peter Achinstein, 2010-05-28 The essays in this volume address three fundamental questions in the philosophy of science What is required for some fact to be evidence for a scientific hypothesis What does it mean to say that a scientist or a theory explains a phenomenon Should scientific theories that postulate unobservable entities such as electrons be construed realistically as aiming to correctly describe a world underlying what is directly observable or should such theories be understood as aiming to correctly describe only the observable world Distinguished philosopher of science Peter Achinstein provides answers to each of these questions in essays written over a period of more than 40 years The present volume brings together his important previously published essays allowing the reader to confront some of the most basic and challenging issues in the philosophy of science and to consider Achinstein's many influential contributions to the solution of these issues He presents a theory of evidence that relates this concept to probability and explanation a theory of explanation that relates this concept to an explaining act as well as to the different ways in which explanations are to be evaluated and an empirical defense of scientific realism that invokes both the concept of evidence and that of explanation How the Ray Gun Got Its Zap Stephen R. Wilk, 2013-10-07 How the Ray Gun Got Its Zap is a collection of essays that discusses odd and unusual topics in optics Though optics is a fairly specialized branch of physics this book extracts from the discipline topics that are particularly interesting mysterious culturally relevant or accessible The essays all first appeared in abbreviated form in Optics and Photonics News and in The Spectrograph the author has updated and expanded upon each of them for this book The book is divided into three thematic sections History Weird Science and Pop Culture Chapters will discuss surprising uses of optics in classics and early astronomy explain why we think of the sun as yellow when it is actually white present how the laser is used in popular film and profile the eccentric scientists who contributed to optics The essays are short and entertaining and can be read in any order The book should appeal to general audiences interested in optics or physics more generally as well as members of the scientific community who are curious about optics phenomena Testing Regimes, Accountabilities and Education Policy Bob Lingard, Goli Rezai-Rashti, Wayne Martino, 2017-10-02 Around the globe various kinds of testing including high stakes national census testing have become meta policies steering educational systems in particular directions and having great effects on schools and on teacher practices as well as upon student learning and curricula There has also been a complementary global aspect to this with the OECD's PISA and IEA's TIMSS and PIRLS which have had impacts on national education systems and their policy frameworks While there has been a globalized educational policy discourse that suggests that high stakes standardised testing will drive up standards and enhance the quality of a nation's human capital and thus their international economic competitiveness this discourse still manifests itself in specific vernacular path dependent ways in different nations High stakes testing and its effects can also be seen as part of
