Congress on Mathematical Education ICME is the largest international conference on mathematics education in the world. This quadrennial event is organized under the auspices of the International Commission on Mathematical Instruction ICMI. This book, the Proceedings of ICME 14, presents the latest trends in mathematics education research and mathematics teaching practices at all levels. Each chapter covers an extensive range of topics in mathematics education. Volume I consists of 4 Plenary Lectures, 3 Plenary Panels, 5 Lectures of Awardees, 4 Survey Teams, 62 Topic Study Groups, 13 Discussion Groups, 20 Workshops, a Thematic Afternoon, and an Early Career Researcher Day. Plenary Lectures recognize substantial and continuing contributions to the growth of the field of Mathematics Education. Plenary Panels address three major challenges currently facing mathematics educators across the globe. The Survey Teams have a particular emphasis on identifying and characterizing important new knowledge, recent developments, new perspectives, and emergent issues. The Topic Study Groups provide a coverage of important topics in mathematics education. Volume II consists of 50 invited lectures which present the work and reflections of both established and emerging researchers from around the world. These lectures cover a wide spectrum of topics, themes, and issues that reflect the latest challenges and development in the field of mathematics education.

Testing Times Willis Richard, 2014-02-07. This book focuses on the delivery of public examinations offered by the main examining boards in England since Victorian England. The investigation reveals that the provision of examinations was as controversial in the nineteenth century as it is today, particularly since the government is now determined to bring in reform. The issues of grade inflation, the place of coursework in marking, and the introduction of technological change all feature in this book. Educational policy is primarily examined, as well as some reference to the global scene. The study analyses archival material from a wide range of sources, including those records stored at the National Archives and the London Metropolitan Archives. An emphasis is placed upon the various institutions that contributed to the process, including the Royal Society of Arts, the London Chamber of Commerce, the City of Guilds of London Institute, and the University of London. Attention is given to the findings of the Taunton Commission and the Bryce Commission, and shorter reports such as the Northcote-Trevelyan Report, which served to radicalise entry and recruitment to the Civil Service. The modern GCSE and the plans for I levels are considered, and key observations are made about the efficacy of those examinations offered by Oxford and Cambridge universities and O levels, A levels, and NVQs. The reader is given every opportunity to benefit enthusiastically in this account of examinations, and those engaged in education, whether teachers, examiners, students, or administrators, will be able to gain useful insights into the workings of the examination system.
