Macro cognition Metrics and Scenarios Janet E. Miller,2018-09-03 Macro cognition Metrics and Scenarios Design and Evaluation for Real World Teams translates advances by scientific leaders in the relatively new area of macro cognition into a format that will support immediate use by members of the software testing and evaluation community for large scale systems as well as trainers of real world teams Macro cognition is defined as how activity in real world teams is adapted to the complex demands of a setting with high consequences for failure The primary distinction

between macrocognition and prior research is that the primary unit for measurement is a real world team coordinating their activity rather than individuals processing information the predominant model for cognition for decades This book provides an overview of the theoretical foundations of macrocognition describes a set of exciting new macrocognitive metrics and provides guidance on using the metrics in the context of different approaches to evaluation and measurement of real world teams **Resources in Education** ,1999-10 Monthly Catalog of United States Government Publications ,1993
