Wells** David C. Smith, 2021-04-07 This collection of H G Wells s correspondence draws on over 50 archives and libraries worldwide including the papers of Wells s daughter by Amber Reeves The book contains over 2 000 letters and while a few are business to publishers agents and secretaries the majority are much more personal Wells s private correspondence extends from letters to President Franklin Roosevelt and Prime Ministers Winston Churchill and A J Balfour to persons such as Mark Benney who wrote novels based on his life in the slums and his time in prison There is correspondence too with his many female friends and lovers among them Rebecca West Eileen Power Gertrude Stein Marie Stopes Lilah MacCarthy and Dorothy Richardson For example a letter from Moura Budberg with whom Wells had a long standing affair which announces that she is pregnant by him and about to have an abortion reveals how an advocate of birth control is himself caught out Wells also enjoyed correspondence with the press particularly during the two World Wars and with various BBC officials and people who worked on his films Some of his letters on the controversies of free love socialism birth control the Fabian Society and the nature of the curriculum of the new London University in the 1890s are included Interspersed chronologically with Wells s letters is a small selection of about 40 letters to Wells where letters from him are not extant Among these are letters from Ray Lankester Joseph Conrad C G Jung Trotsky Hedy Gattarnigg the woman who attempted suicide in Wells s flat and J C Smuts The letters are arranged in these periods Volume 1 1878 1900 Volume 2 1901 1912 Volume 3 1913 1930 and Volume 4 1930 1946 H G Wells s works include *The Time Machine* 1895 *The Invisible Man* 1897 *The War of the Worlds* 1898 *The History of Mr Polly* 1910 and *A Short History of the World* 1922      **U.S. Government Research Reports**, 1964      **John von Neumann and the Origins of Modern Computing** William Aspray, 1990-12-07 William Aspray provides the first broad and detailed account of von Neumann s many different contributions to computing John von Neumann 1903 1957 was unquestionably one of the most brilliant scientists of the twentieth century He made major contributions to quantum mechanics and mathematical physics and in 1943 began a new and all too short career in computer science William Aspray provides the first broad and detailed account of von Neumann s many different contributions to computing These Aspray reveals extended far beyond his well known work in the design and construction of computer

systems to include important scientific applications the revival of numerical analysis and the creation of a theory of computing Aspray points out that from the beginning von Neumann took a wider and more theoretical view than other computer pioneers In the now famous EDVAC report of 1945 von Neumann clearly stated the idea of a stored program that resides in the computer's memory along with the data it was to operate on This stored program computer was described in terms of idealized neurons highlighting the analogy between the digital computer and the human brain Aspray describes von Neumann's development during the next decade and almost entirely alone of a theory of complicated information processing systems or automata and the introduction of themes such as learning reliability of systems with unreliable components self replication and the importance of memory and storage capacity in biological nervous systems many of these themes remain at the heart of current investigations in parallel or neurocomputing Aspray allows the record to speak for itself He unravels an intricate sequence of stories generated by von Neumann's work and brings into focus the interplay of personalities centered about von Neumann He documents the complex interactions of science the military and business and shows how progress in applied mathematics was intertwined with that in computers William Aspray is Director of the Center for the History of Electrical Engineering at The Institute of Electrical and Electronics Engineers

and Teacher Profiles model best practices and supply readers with concrete teaching tools and strategies Mathematical Thinking Mathematical Games and Mathematics and Technology features detail activities to engage and develop students mathematical thinking Accompanying student artifacts illustrate the progression of students conceptual understanding CD logo replaces bullet Math Activities CD ROM provides an outstanding text component containing more than 100 activities that use a three step process explore invent discover to foster the development of mathematical thinking through guided inquiry Aligned with the NCTM standards each activity is integrated within the text and designed to help develop students conceptual understanding of mathematics Mathematics in Literature offers thoroughly developed ideas for using children s literature to create meaningful contexts for mathematics learning An extensive bibliography that can be used for this purpose appears on the CD Rom I think the text is an excellent resource for elementary and middle school methods courses In particular I like how the textbook handles the bigger issues such as geometric reasoning rather than just geometry I also like the excellent foundation in educational research that the textbook provides as well as some very careful attention and consistent referencing to the NCTM standards and principles The incorporation of classroom vignettes teacher illustrations and samples of student work also all add to the excellent grounding of the text in real world classroom work Dr Neal Grandgenett University of Nebraska at Omaha     A Beautiful Mind Sylvia Nasar,2011-07-12 Also an Academy Award winning film starring Russell Crowe and Jennifer Connelly directed by Ron Howard The powerful dramatic biography of math genius John Nash who overcame serious mental illness and schizophrenia to win the Nobel Prize How could you a mathematician believe that extraterrestrials were sending you messages the visitor from Harvard asked the West Virginian with the movie star looks and Olympian manner Because the ideas I had about supernatural beings came to me the same way my mathematical ideas did came the answer So I took them seriously Thus begins the true story of John Nash the mathematical genius who was a legend by age thirty when he slipped into madness and who thanks to the selflessness of a beautiful woman and the loyalty of the mathematics community emerged after decades of ghostlike existence to win a Nobel Prize for triggering the game theory revolution The inspiration for an Academy Award winning movie Sylvia Nasar s now classic biography is a drama about the mystery of the human mind triumph over adversity and the healing power of love

*Out of the Crystal Maze* Lillian Hoddeson,Ernst Braun,Jurgen Teichmann,Spencer Weart,1992-10-01 This landmark work chronicles the origin and evolution of solid state physics which grew to maturity between 1920 and 1960 The book examines the early roots of the field in industrial scientific and artistic efforts and traces them through the 1950s when many physicists around the world recognized themselves as members of a distinct subfield of physics research centered on solids The book opens with an account of scientific and social developments that preceded the discovery of quantum mechanics including the invention of new experimental means for studying solids and the establishment of the first industrial laboratories The authors set the stage for the modern era by detailing the formulation of the quantum field theory of solids The core of the book

examines six major themes the band theory of solids the phenomenology of imperfect crystals the puzzle of the plastic properties of solids solved by the discovery of dislocations magnetism semiconductor physics and collective phenomena the context in which old puzzles such as superconductivity and superfluidity were finally solved All readers interested in the history of science will find this absorbing volume an essential resource for understanding the emergence of contemporary physics
