L'émergence de la médecine scientifique Anne Fagot-Largeault, 2018-03-29 Une réflexion philosophique sur la médecine. Conçu dans une perspective historique longue le développement de la médecine semble marqué par la coexistence en son sein d'une urgence laquelle il faut répondre et d'un manque auquel il faut remédier. Cette urgence c'est celle du soin prodiguer celui qui souffre ici et maintenant pour que justement cette souffrance cesse. Ce manque c'est celui d'une connaissance objective qui permettrait de comprendre les mécanismes des maladies afin d'y mettre un terme de soigner les souffrances qu'elles occasionnent en connaissance de cause. Or c'est bien la reconnaissance conjointe de cette urgence et de ce manque qui peuvent expliquer pourquoi les espoirs tant très mesurés tant très immenses mis en la médecine ont si souvent trahi si le salut du malade passe par la science *per scientiam ad salutem groti* et que la science fait défaut quel salut pour le malade. D'où l'injonction faite l'art médical tout au long de son histoire de se fonder sur une connaissance du normal et du pathologique ou encore plus radicalement celle faite la médecine de devenir scientifique. Ainsi seulement pensait-on et pense-t-on encore aujourd'hui pourrait-on garantir avec certitude tout la fois l'exactitude du diagnostic la fiabilité du pronostic et l'efficacité de la thérapeutique idéal méthodologique admirablement capturé par une maxime positiviste fameuse science d'où prouvoiance prouvoiance d'où action. C'est l'écart entre cet idéal ou ce rêve méthodologique et le développement historique effectif de la médecine que les articles réunis dans ce volume contribuent à clarifier. Un ensemble d'articles qui se penchent sur différentes facettes de la médecine scientifique telles que son idéal sa méthodologie son approche ses limites son évolution. EXTRAIT De leur côté les médecins praticiens avaient eux aussi leurs propres soucis. L'enseignement médical mettait l'accent sur deux manières de prendre de bonnes décisions cliniques la médecine était la fois une science et un art. Or ni la science ni l'art ne fournissaient de base solide la décision clinique. La science médicale dérivait des sciences fondamentales traditionnellement enseignées dans les facultés de médecine sciences de laboratoire comme l'anatomie et la physiologie. Lorsque il fallait appliquer cette science au lit du malade l'art prenait le dessus. Cet art était enseigné avec autorité par d'illustres cliniciens qui guidaient un apprentissage de plusieurs années.
