Expertise in Every Classroom Amanda Shuford Mayeaux,Dianne F. Olivier,2020-03-23 Expertise in every classroom should be the norm not the exception We have all had that magical teacher who we remember years later We remember how this teacher made us believe we could do anything The mythical experts exist and have much to teach us in our quest to build a powerhouse education system Unfortunately forty years of research and over 25 years of reform models have led to few changes in the teaching profession and in the overall outcomes in education Both national and international research demonstrates expertise in teaching can be clearly defined and developed Countries around the world have successfully revamped their systems to develop and support expert teachers While we grapple with failed value added models and are beginning to understand linkage to single achievement test scores leaves out the impact teachers have upon the students peers and the culture as a whole We have erected barriers in the form of scripted curricula overuse of testing and failed professional development models Yet some teachers overcome all the barriers and develop expertise These teachers find avenues of development either in small pockets of peers or individually While other countries are developing

experts in mass numbers the United States is creating such teachers in very small pockets Examining the thinking processes and practice of these teachers offers a glimpse into what we should desire in every classroom in every school This book bridges both research and practical elements We believe expert teachers desire both We often discuss the disconnect between research and practice This book is intended to bridge both academic expectations and practitioner expectations We believe the academic community must make research accessible and user friendly to practitioners and practitioners should be at the forefront of research discussions We must blend the ivory towers of academia with the daily work in our schools if we are to create world class systems Expert teachers are both academic researchers and critical practitioners Reform movements are showing little progress We need to redefine the profession
