## Mid Year Exam 2014 G8:

Education Sector Plans and their Implementation in Developing Countries Roy Carr-Hill, 2023-03-09 This book examines the factors affecting the successful implementation of Education Sector Plans in developing countries. It provides a detailed comparison that draws on data from 27 countries to offer careful research conclusions and policy recommendations. Offering a detailed comparison of the schooling situation e.g. availability of potable water and toilets provision for the disabled as well as educational outcomes both test scores and percentages out of school from the 27 countries using empirical evidence, the book examines the resources that have been invested in different education sectors, investigating the development and success of each plan. The volume uses correlation analysis to compare factors including the availability of government funding, national characteristics, ministerial decisions, influences of country and donor stakeholders as well as district and school level issues. Thorough comparative analysis of the data is then demonstrated with two measures of achievements to identify which factors can be considered as the most important in order to reach realistic policy and research conclusions. Timely and engaging, this book will be of great interest to researchers, scholars and postgraduate students in the field of education and international development. comparative education and international education more broadly **A Loud but Noisy Signal?** Marius R. Busemeyer, Julian L. Garritzmann, Erik Neimanns, 2020-09-03 This path breaking addition to the Comparative Politics of Education series studies the influence of public opinion on the contemporary politics of education reform in Western Europe. The authors analyze new data from a survey of public opinion on education policy across eight countries and they also provide detailed case studies of reform processes based on interviews with policy makers and stakeholders. The book's core finding is that public opinion has the greatest influence in a world of loud politics when salience is high and attitudes are coherent. In contrast, when issues are salient but attitudes are conflicting, the signal of public opinion turns loud but noisy and party politics have a stronger influence on policy making. In the case of quiet politics, when issue salience is low, interest groups are dominant. This book is required reading for anyone seeking to make sense of policy makers' selective responsiveness to public demands and concerns. High-Table Diplomacy Kjell Engelbrekt, 2016-06-10 The proliferation of minilateral summits is reshaping how international security problems are addressed, yet these summits remain a poorly understood phenomenon. In this groundbreaking work, Kjell Engelbrekt contrasts the most important minilateral summits, the G7, formerly G8 and G20, with the older and more formal UN Security Council to assess where the diplomacy of international security is taking place and whether these institutions complement or compete with each other. Engelbrekt's research in primary source documents of the G7, G8, G20 and UN Security Council provides unique insight into how these institutions deliberate on three policy areas: conflict management, counterterrorism, cooperation and climate change mitigation. Relatively informal and flexible GX diplomacy invites more countries to take a seat at the table and allows nontraditional security threats to be placed on the agenda. Engelbrekt concludes, however, that there is a continuing need for

institutions like the UN to address traditional security problems High Table Diplomacy will provoke discussion and further research on the role of minilateral summits among scholars of international relations security studies and international organizations
