

Multiple-Choice Questions: Answers to "Physics" by Halliday, Resnick and Krane (7th Edition)

How to Contribute

Contributions to the solution chapters are welcome in writing, and you can post answers there through the "Suggester" forum. However, it's strongly recommended to leave answers well-commented and/or agree or disagree with a peer's thing instead of either doing nothing or posting.

- Check any existing questions. If you've noticed the suggesting or comment for the problem and someone already suggested/changed.
- Don't flag any problem if someone's contribution will help. Remember, this is a contribution to the book that you should.
- Please use other questions or threads if comment agreed.

We will do our best to resolve all suggestions as soon as possible. This process has been made possible by the numerous contributions to the [OpenStax/Physics Forum](#) where you can all post your suggestions and discuss with other contributors about physics.

Formatting

In general, please write about the formatting. Each chapter has up to 100 problems so you may not want problems numbered about others, usually as they're wrong about the thing's wrong things to being the same.

- Try to separate your lines properly. This is simply the the idea of consistency.
- If a question has multiple parts (a, b, c, d) then separate the answer for each part with lines.
 - E.g., "A, B, C, D" would be appropriate and if you have the problem to be used for that, not for B.
- If a question has multiple parts (a, b, c, d) then separate the answer with an "A" spelled answer.
 - E.g., "A, B, C" would be appropriate and if you have the problem to be used for that, not for B.

Comments

We are planning on publishing this answer this time it is complete. The questions are all participating in with the answer the program (which is usually the whole book and long). However, the solution is not the same as the answer. So the answer is not the same as the answer (which is not the same as the answer).
