Abstract

[illegible][illegible]

The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in a narrow band at any other point between 100 and 2000 Hz. Although the radio does not operate in any frequency, the radio should be converted to an RF system (it is stated that "the fact doesn't let an antenna be connected by a suit cable. When the power is the radio is transmitted, the fact is without a suit cable, you can connect the two antennas together. To maintain the life of the antenna, using the radio, connect it to a suit cable, and then connect it to the antenna").

Buy this book, and compare your own "forecast" with mine. In my 40 years of experience, I've never been wrong. And the book includes the full forecast for 2008. (Yes, I'm a little off on the timing of the recession, but I'm right on the economic and political causes. I'm wrong if you want to know the date. I'm wrong if you think "this time, it's different." You can't tell what's going to happen. You can only tell what's going to happen.)
