Experiments in Agency Supriya Baily, Farnoosh Shahrokhi, Tami Carsillo, 2017-04-13 This book is about teacher agency and leadership but it is also an experiment in shifting the balance of power in research and writing. It is about making accessible the process of academic publishing in a way that capitalizes on the knowledge of people in diverse contexts and with novice eyes and is an experiment in sharing academic writing between master teachers and doctoral students. It is also a book on the power of action research and the belief we have as teacher educators about the transformative power of teachers in their own classrooms. Pairing master teachers from ten countries who were part of the Teaching Excellence and Achievement Program with graduate students, this book provides a framework to decolonize research practices in an effort to re-envision research methodologies on a global scale. The book also provides a tangible way to see how research processes support local transformation and direct engagement of those at the margins to play a greater role in the production of scholarly knowledge. The cross-national scope of this book with authors working in classrooms in countries as diverse as Turkey, Chile, and Bangladesh, coupled with the work of novice US-based scholars to engage in the conceptualizing, researching, data analysis, and writing of chapters, speaks to the importance of new voices in the field of research. Additionally, the combination of teacher research projects in the classroom juxtaposed with chapters that speak to the process of teacher research in a global context provides both theoretical and empirical foundations for teacher research.

The Plurilingual TESOL Teacher Elizabeth Ellis, 2016-10-24 This book introduces a new topic to applied linguistics the significance of the TESOL teacher's background as a learner and user of additional languages The development of the global TESOL profession as a largely English only enterprise has led to the accepted view that as long as the teacher has English proficiency then her or his other languages are irrelevant The book questions this view Learners are in the process of becoming plurilingual and this book argues that they are best served by a teacher who has experience of plurilingualism The book proposes a new way of looking at teacher linguistic identity by examining in detail the rich language

biographies of teachers of growing up with two or more languages of learning languages through schooling or as an adult of migrating to another linguaculture of living in a plurilingual family and many more The book examines the history of language in education policy which has led to the development of the TESOL profession in Australia and elsewhere as a monolingual enterprise It shows that teachers language backgrounds have been ignored in teacher selection teacher training and ongoing professional development The author draws on literature in teacher cognition bilingualism studies intercultural competence bilingual lifewriting and linguistic identity to argue that languages play a key part in the development of teachers professional beliefs identity language awareness and language learning awareness Drawing on three studies involving 115 teachers from Australia and seven other countries the author demonstrates conclusively that large numbers of teachers do have plurilingual experiences that these experiences are ignored in the profession but that they have powerful effects on the formation of beliefs about language learning and teaching which underpin good practice Those teachers who identify as monolingual almost invariably have some language learning experience but it was low level short lived and unsuccessful How does the experience of successful or unsuccessful language learning and language use affect one s identity beliefs and practice as an English language teacher What kinds of experience are most beneficial These concepts and findings have implications for teacher language education teacher professional development and the current calls for increased plurilingual practices in the TESOL classroom

leaves teachers underprepared for the fact that the actual needs of their students may not necessarily include all things Anglophone The book aims to raise awareness of the cultural bias that continues to exist in ELT It offers an approach which includes content and methodology which rebalances cultural content to include more localised and multicultural context It considers the skills needed by contemporary learners whose motivation is to interact interculturally with both native and non native speakers of the language
