Ellerton,2017-10-28 In this well illustrated book the authors Sinan Kanbir Ken Clements and Nerida Ellerton tackle a persistent and universal problem in school mathematics why do so many middle school and secondary school students find it difficult to learn algebra well What makes the book important are the unique features which comprise the design research approach that the authors adopted in seeking a solution to the problem The first unique feature is that the authors offer an overview of the history of school algebra Despite the fact that algebra has been an important component of secondary school mathematics for more than three centuries there has never been a comprehensive historical analysis of factors influencing the teaching and learning of that component The authors identify through historical analysis six purposes of school algebra a algebra as a body of knowledge essential to higher mathematical and scientific studies b algebra as generalized arithmetic c algebra as a prerequisite for entry to higher studies d algebra as offering a language and set of procedures for modeling real life problems e algebra as an aid to describing structural properties in elementary mathematics and f algebra as a study of variables They also raise the question whether school

algebra represents a unidimensional trait Kanbir Clements and Ellerton offer an unusual hybrid theoretical framework for their intervention study by which seventh grade students significantly improved their elementary algebra knowledge and skills Their theoretical frame combined Charles Sanders Peirce s triadic signifier interpretant signified theory which is in the realm of semiotics with Johann Friedrich Herbart s theory of apperception and Ken Clements and Gina Del Campo s theory relating to the need to expand modes of communications in mathematics classrooms so that students engage in receptive and expressive modes Practicing classroom teachers formed part of the research team This book appears in Springer s series on the History of Mathematics Education Not only does it include an important analysis of the history of school algebra but it also adopts a theoretical frame which relies more on theories from the past than on contemporary theories in the field of mathematics education The results of the well designed classroom intervention are sufficiently impressive that the study might have created and illuminated a pathway for future researchers to take *Library Journal* Melvil Dewey, Karl Brown, Frederick Leypoldt, Bertine Emma Weston, Helen E Wessells, 1969 Includes beginning Sept 15 1954 and on the 15th of each month Sept May a special section School library journal ISSN 0000 0035 called Juniorlibraries 1954 May 1961 Issued also separately *Bibliographic Guide to Education* 2003 GK Hall, 2004-10 The Bibliographic Guide to Education lists recent publications cataloged during the past year by Teachers College Columbia University supplemented by publications in the field of education cataloged by The Research Libraries of The New York Public Library selected on the basis of subject headings Non book materials including theses are included in this Guide with the exception of serials All aspects and levels of education are represented in this Guide including such areas as American elementary and secondary education higher and adult education early childhood education history and philosophy of education applied pedagogy international and comparative education educational administration education of the culturally disadvantaged and physically handicapped nursing education and education of minorities and women Also well covered are the administrative reports of departments of education for various countries and for U S states and large cities The Teachers College collection covers over 200 distinct educational systems Works in all languages are included The Bibliographic Guide to Education serves in part as an annual supplement to the Dictionary Catalog of the Teachers College Library Columbia University G K Hall Second Supplement 1973 Third Supplement 1977 *Who's who in American Education* , 1989
